

Water Straw

Water Straw

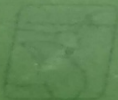

Put the bottom of the water straw into the water. Sip from the mouthpiece. When the water is too far to reach, connect and put the hose into the water.

Can connect with the water bag (owned or bottle washed), then press the bag or bottle to drink.

Use the straw to connect the reserve water bag (owned), filter the water by water pressure. It is suitable for multi-user.

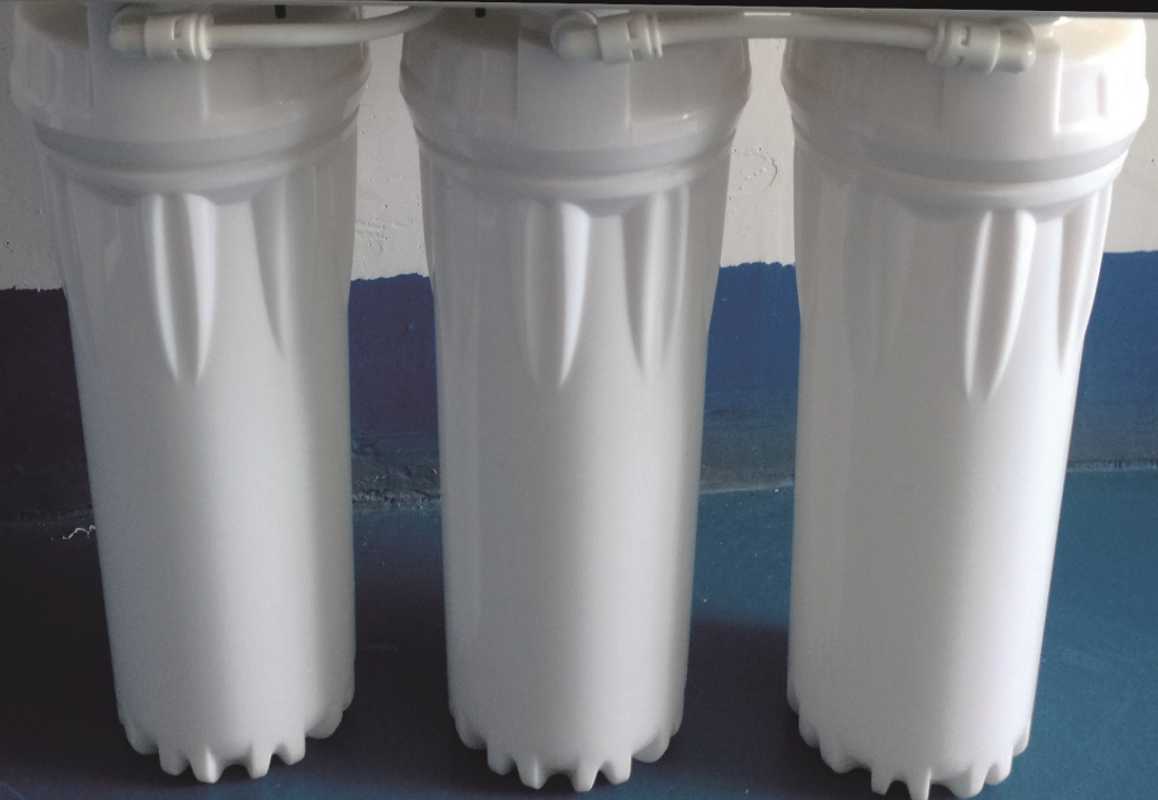

WATER STRAW

Water filter straw provides safe and clean drinking water during an emergency, earthquake, tsunami, hurricane and other disasters. Travel with water filter straw for protection and drink clean water.
