

bulletins and reports providing information regarding estimates of insured loss and actual insured loss resulting from catastrophic events, newsletters, bulletins and reports that provide information about weather events and other catastrophes, and newsletters, bulletins and reports with information in the insurance industry recorded on computer media; simulation software in the fields of insurance, risk management, finance, and investment, for the modeling of natural and man-made events; catastrophe modeling software for use in the fields of insurance, risk management, finance, and investment; weather modeling software; climate modeling software for use in the fields of insurance, risk management, finance, and investment; software for use in the field of risk management; loss modeling software for use in the fields of insurance, risk management, finance, and investment; software for use in the fields of insurance, risk management, finance, and investment, to model rebuild and replacement costs for damaged structures; software for use in the fields of insurance, risk management, finance, and investment, for climate, environment and disaster risk management; downloadable electronic reports with information on and analysis of fire protection efforts; downloadable electronic reports with ratings information relating to fire protection efforts used to evaluate risk; downloadable electronic reports in the fields of insurance and risk management with information on and analysis of risk and risk mitigation in communities, namely, information on and analysis of hazard assessment and management, resource allocation, budgeting, critical infrastructure, loss mitigation, emergency communications, water supply, and flood risk; downloadable electronic reports in the fields of insurance and risk management with information on and analysis of laws, statutes, ordinances, regulations and standards and on compliance therewith and adoption and enforcement thereof; software for providing information and analytics about insurance and insurance claims; software used to analyze and manage risk, to compile insurance claim information, to analyze insurance claim information, to identify and detect fraud and abuse and to provide downloadable reports related thereto; downloadable electronic reports and downloadable electronic data files with information and analytics relating to insurance data, insurance claims, and insurance fraud and abuse; software for use by property and casualty insurance companies for claims management, compliance and reporting; software for the purpose of review and verification of Medicaid and Medicare eligibility status and related information; software for use in analyzing and manipulating data for generating presentations and charts in the field of insurance; software for creating diagrams of accidents, and evaluating the potential for subrogation; downloadable images of roofs, building structures, property, terrain and other objects and conditions; software for cost estimating and other assessments in the building, construction, repair, restoration, maintenance and remodeling industries; software for detecting, identifying, measuring and analyzing roofs, building structures, property, terrain and other objects and conditions; software for use in connection with aerial, terrestrial, satellite and other imagery and remote sensing technologies and with photographic data, geospatial data, locational data and other information and data generated in connection with remote sensing technologies; downloadable reports with aerial, terrestrial, satellite and other imagery and remote sensing technologies and with photographic data, geospatial data, locational data and other information and data generated in connection with remote sensing technologies; software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, and aerial, terrestrial, satellite, and geospatial imagery and other imagery and outputs from sensory and detection technologies; software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, and aerial, terrestrial, satellite, and geospatial imagery, and other imagery and outputs from sensory and detection technologies in the fields of in the fields of energy and natural resources, agriculture, mining, transportation, supply chain, engineering, weather and climate, cartography,

insurance, banking, construction, real estate, law enforcement, emergency services, government, real estate, astronomy and space exploration and geopolitics; software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, aerial, terrestrial, satellite, and geospatial imagery, and other imagery and outputs from sensory and detection technologies in connection with fraud detection, assessment of energy efficiency, analysis of infrastructure, analysis of electrical utilities infrastructure, forensic analysis, geographical information systems and risk assessment, risk detection, risk analysis, and risk management; software for creating drawings, floorplans, and schematics of building structures, roofs, other features of building structures, property, terrain and other objects and conditions; software for integrating electronic data and other information with real world environments; software for integrating electronic data and other information with real world environments for the purpose of generating maps, representations of building structures, roofs, other features of building structures, property, and terrain and other objects and conditions; software for use in providing information featuring aerial, terrestrial, satellite and geospatial imagery, and other imagery and other remote sensing technologies and photographic data, geospatial data, locational data and other information and data generated in connection with remote sensing technologies; software for photogrammetric analysis; software for use in detection, inspection, evaluation and assessment of buildings and other objects and conditions; software for risk assessment, analysis and management and hazard assessment, analysis and management; software to assist in insurance claims assessment, analysis and management; software for capturing, storing, managing, processing and transmitting photos, videos and other sensory and detection information; software used for capturing, storing and accessing images and geographic, locational and other data regarding the captured, stored and accessed images; software for use in analysis, predictive modeling, and creating reports, relating to property damages, loss information, catastrophic loss information, climate, weather events, catastrophes and other events and conditions; software for controlling imaging apparatus and technologies and other sensory and detection apparatus and technologies; software for use in valuations of real estate, buildings, fixtures, personal property and other objects; software for identifying, documenting, inventorying, and monitoring personal, commercial, and industrial property and other objects and any damage thereto and status, condition, value and location thereof; software, namely, graphic based construction estimation software, which estimates the cost of building or repairing structures and other objects; software, namely, cost estimation, project management and analytic reporting software; software for identifying, estimating and valuing insuring, remodeling, replacement and construction costs; downloadable reports, data files and software featuring information and analytics regarding weather, hazards and other events conditions; downloadable electronic maps featuring information and analytics regarding weather, hazards and other conditions; downloadable software for creating and viewing reports and maps; downloadable books, white papers, research papers, instruction books, tutorials, treatises and educational games, all in the field of photography, videography, technology, use of imagery, geospatial intelligence and analysis, manned and unmanned aerial vehicles and related technology, insurance, real estate, building and construction, catastrophes, climate, weather events and issues, energy, natural resources, geopolitics, agriculture, and products, consulting and services related thereto; software for the operation of unmanned aerial systems; downloadable reports with information from computers or sensors relating to the status and conditions in residential and commercial buildings and in vehicles; software for searching, organizing, analyzing, processing, managing, categorizing, creating, and editing insurance and financial documents; downloadable electronic documents in the nature of downloadable electronic data files featuring coverage forms, endorsements, schedules, and other insurance and financial forms, for use in the insurance and financial industries

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 16: Printed reports featuring insurance information; printed publications, namely, newsletters, pamphlets, and booklets featuring insurance information; printed reports with information on and analysis of laws, statutes, ordinances, regulations and standards and on compliance therewith and adoption and enforcement thereof; printed reports with information on and analysis of fire protection efforts; printed reports with ratings information relating to fire protection efforts used to evaluate risk; printed reports with information on and analysis of risk and risk mitigation in communities, namely, information on and analysis of hazard assessment and management, resource allocation, budgeting, critical infrastructure, loss mitigation, emergency communications, water supply, and flood risk

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 35: Trade information in the field of insurance; arranging and conducting business conferences on technology for persons in the business of insurance; business consulting and advisory services in the field of business risk management related to climate, environment and disaster risk management; business investigations for fraud prevention; providing business marketing data to insurance businesses; preparation of business reports featuring information on and analysis of business laws, statutes, ordinances, regulations and business standards and on compliance therewith and enforcement thereof; compilation and analysis of business information for use in the insurance and financial industries; compilation and analysis of business information to assist in insurance claims analysis, risk management and analysis, financial risk assessment, and financial and investment analysis, all of the aforesaid being for business purposes; providing a secured access database via the Internet through which documents and images can be viewed, copied and printed for the purpose of conducting insurance business; compiling and analyzing data in the field of insurance; management consulting services, namely, organizational analysis; providing pricing information for use in estimating and valuing the costs of construction, remodeling, repair or replacement of residential, commercial, industrial and agricultural structures and the fixtures and contents thereof; compilation and analysis of data in the field of insurance; auditing of insurance claims estimations; business consulting services; providing business information; providing in-person business and commercial forums in the fields of technology, use of imagery, geospatial intelligence and analysis, manned and unmanned aerial vehicles and related technology, insurance, real estate, building and construction, catastrophes, climate, weather events and issues, energy, natural resources, geopolitics, agriculture, and products, consulting and services related thereto; business research and data analysis services in the field of drone services; information in the field of energy efficiency, namely, providing an interactive website featuring information, imagery, and analysis relating to natural resources, energy, energy efficiency, electrical utilities infrastructure in the fields of agriculture, geopolitics, mining, transportation, supply chain, engineering, cartography, insurance, banking, construction, real estate, law enforcement, emergency services, government, astronomy and space exploration, weather, and climate

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 36: Providing databases and information in the field of insurance and related insurance services, for use in generating reports using the accessed data; providing databases featuring information in the field of insurance for the purpose of assisting with insurance underwriting, insurance rating information, insurance claims review, analysis and processing, auditing, and computing, estimating, and analyzing insurance loss information; providing information about insurance matters and insurance claims via a global computer network; insurance underwriting information services, namely, insurance underwriting consultation; insurance analysis services, namely, assessing insurance risk, assessing insurance claims, and assessing insurance loss and cost information; providing insurance rating information about personal and commercial lines to insurers and rating vendors, namely, providing information on risk factors for use in rating insurance policies; insurance rating services and insurance rating data services, namely, providing insurance rating data allowing insurance carriers and

insurance underwriters to use and apply insurance rates using predefined decisions and parameters, providing insurance rating data to update those predefined decisions and parameters automatically upon the filing of new rates with the state insurance departments, and providing databases featuring insurance rating data using predictive modeling to allow insurance carriers and insurance underwriters to rate and underwrite insurance policies; financial and insurance risk management services, namely, providing to others, over a global communications network, financial and insurance risk management data, information, and analytics about real property, personal property, and buildings for purposes of insurance underwriting, insurance claims processing and insurance analysis, all for assessing financial and insurance risks, and risks relating to commercial transactions; providing financial assessments of damage to insured property after a catastrophe; providing information, namely, providing financial assessments of damages after a disaster relating to weather events and other catastrophes, and financial estimates of insured loss and actual insured loss resulting from catastrophic events, to assist in insurance claims management and analysis, insurance risk management and analysis, financial risk assessment, and financial and investment analysis; providing insurance and financial risk analysis information relating to insurance and financial risks associated with climate, environment and disaster risk management; providing climate, environment and disaster risk data for use in the insurance field, namely, providing financial risk assessments relating to potential and actual climatic and environmental factors and conditions and damages relating to disasters; providing insurance and financial assessment decision analytics, namely, analysis of insurance and financial risks for manufacturers, insurance carriers, commodities traders and commercial entities in the supply chain in the field of climate, environment and disaster risk management; providing insurance policy language, namely, policy writing in the field of property and casualty insurance for others; consulting and providing information in the field of insurance; providing information and analytics regarding locations and characteristics of real and personal property for purposes of insurance and insurance risk assessment; providing financial and insurance risk information to assist with detection of insurance fraud; providing on-line computer databases featuring information on financial and insurance laws, statutes, ordinances, regulations and financial and insurance standards and on compliance therewith and adoption and enforcement thereof; compilation and analysis of information relating to fire protection efforts for use in the fields of insurance and financial services; providing information on and analysis of fire protection efforts for use in underwriting of insurance and financial services products; providing ratings information relating to fire protection efforts used to evaluate insurance and financial risk; providing on-line computer databases featuring insurance and financial risk information on and analysis of risk and risk mitigation in communities, namely, insurance and financial risk information on and analysis of hazard assessment and management, financial resource allocation, financial budgeting, critical infrastructure, financial loss mitigation, emergency communications, water supply, and flood risk; providing information and analytics relating to insurance data, insurance claims, and insurance fraud and abuse; providing information in the field of insurance claims management and analysis, information on weather and natural hazards, information on property foreclosures, personal information about insureds, third party claimants, medical providers, attorneys, and businesses, financial information about insureds, third party claimants, medical providers, attorneys, and businesses, and information about criminal backgrounds of insureds, third party claimants, medical providers, attorneys, and businesses; providing insurance information, insurance claims information, and information about insurance fraud and abuse, by email and other electronic means; providing a website featuring information and predictive analytics about insurance, insurance claims, insurance risks; providing information regarding insurance claims and insurance fraud and abuse distributed electronically by email; providing information on bodily injuries to assist in insurance claims management and analysis; providing information on insurance claims settlements; insurance services, namely, providing information and on-line computer databases for the purpose of review and verification of Medicaid and Medicare eligibility status and related information; online database containing police, fire, coroners and Department of Motor Vehicles (DMV) reports, accident reports, weather reports, fire reports and death

certificates for use by insurer in handling insurer claims and insurance investigations; obtaining and providing information and imagery on property damage, weather events and catastrophes, climate, agriculture, natural resources, energy sources, and terrain, to assist in insurance claims management and analysis, risk management and analysis, financial risk assessment, financial and investment analysis, and real estate valuation, and real estate risk management and analysis; insurance appraisals and evaluations; providing information in the field of insurance claims management and analysis, namely, information on weather, climate, and natural hazards; providing databases featuring coverage forms, endorsements, schedules, and other insurance and financial forms in the fields of insurance and finance; consulting and advisory services relating to searching, organizing, analyzing, processing, managing, categorizing, creating, and editing insurance and financial documents, and developing and implementing coverage forms, endorsements, schedules, and other insurance and financial forms; providing on-line searchable databases featuring information on weather-related events, other catastrophic events, and estimates of insured loss and actual insured loss resulting from catastrophic events to assist in insurance claims management and analysis; financial and insurance information services, namely, providing risk analysis information relating to structural properties for financial and insurance risk assessment purposes; insurance services, namely, providing scoring information relating to insurance claims; providing an interactive website notifying insurers by electronic message notification about the filing of insurance claims

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 38: Electronic transmission of information on data from aerial, terrestrial, and satellite imagery and other remote sensing technologies, photographic data, geospatial data, locational data, insurance claims, valuations of real estate, buildings, fixtures, and personal property, and building construction cost estimating and valuation

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 41: Educational services, namely, conducting conferences in the fields of insurance, catastrophe insurance and catastrophe response; providing online non-downloadable publications in the nature of electronic reports with information on and analysis of insurance data, insurance claims and insurance fraud and abuse via a global computer network; non-downloadable electronic publications in the nature of reports with information and analysis relating to data from aerial, terrestrial, and satellite imagery and other remote sensing technologies, photographic data, and geospatial data; educational services, namely, providing in-person and on-line training courses, seminars and workshops and providing round table and panel discussions, in the fields of technology, use of imagery, geospatial intelligence and analysis, manned and unmanned aerial vehicles and related technology, insurance, real estate, building and construction, climate, catastrophes, weather events and issues, energy, natural resources, geopolitics, agriculture, and products, consulting and services related thereto; aerial photography and videography services; training in the use and operation of unmanned aerial vehicles and consultation relating thereto; providing online non-downloadable publications in the nature of electronic reports with information on and analysis of risk and risk mitigation in communities, namely, information on and analysis of hazard assessment and management, resource allocation, budgeting, critical infrastructure, loss mitigation, emergency communications, water supply, and flood risk via a global computer network; providing online nondownloadable books, white papers, research papers, instruction books, tutorials, treatises and educational games, all in the fields of photography, videography, technology, use of imagery, geospatial intelligence and analysis, manned and unmanned aerial vehicles and related technology, insurance, real estate, building and construction, catastrophes, climate, weather events and issues, energy, natural resources, geopolitics, agriculture, and products, consulting and services related thereto

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 42: Providing on-line, nondownloadable software for use in the fields of insurance, insurance services, insurance underwriting, insurance rating information, and insurance claims review, analysis and processing, namely, online non-downloadable software for computing, estimating, and analyzing insurance loss information and risk information, for accessing information on insurance ratings, and for accessing information for the analysis of insurance risk, insurance underwriting, and insurance coverage; providing on-line, non-downloadable software for providing information about insurance data and assisting with analysis of insurance information and detection of insurance fraud; providing on-line, non-downloadable software for use by insurance companies to create a database of insurance statistics and insurance claims information and to analyze comparative liability in accident-related claims and develop settlement proposals for those claims; providing on-line, non-downloadable software for use by insurance companies to create a database of insurance statistics and insurance claims information and to analyze workers compensation claims and provide plans for settlement of those claims and return to work for injured workers; providing on-line, non-downloadable software for use by insurance companies to create a database of insurance statistics and insurance claims information and to analyze bodily injury claims and develop plans for settlement of those claims; providing on-line, non-downloadable software for use in profiling healthcare provider billing activity in order to identify and prevent patterns of fraud and abuse; providing on-line, non-downloadable software for outsourcing insurance premium audits and for linking users of insurance premium audit services to high-quality vendors; providing on-line, non-downloadable software comprising an integrated suite of rating and underwriting tools for insurance underwriting and analysis for use in the insurance industry; providing on-line non-downloadable software for use in analysis, predictive modeling, and creating reports, relating to catastrophic loss information, weather events and other catastrophes; reporting services, namely, providing emails, electronic reports and databases reporting on weather events and other catastrophes; consultancy services in the fields of developing computer simulation software for others for the modeling of natural and man-made events, catastrophe modeling computer software, weather modeling computer software, climate modeling computer software; consultancy services, namely, consulting on the selection, implementation and use of software for use in risk assessment in the fields of risk management computer software, loss modeling computer software, and computer software to create computer models relating to the rebuilding and replacement costs for damaged commercial or residential structures; providing on-line, non-downloadable software for use by insurance companies, reinsurance companies, and insurance and reinsurance intermediaries and others for analyzing the risk of damage and financial exposure to real estate damaged by hurricanes, tornadoes, earthquakes and natural disasters and for creating reports and spreadsheets thereof; providing a secured-access website accessible over a global computer network featuring technology that allows users to enter, access, and synthesize information in the field of risk analysis associated with climate, environment and disaster risk management; providing on-line, non-downloadable software for climate, environment and disaster risk management; providing on-line, non-downloadable software to validate insurance claim submissions and detect, investigate, audit and manage fraudulent insurance claims and over-payment of insurance claims; providing ratings information, namely, ratings of safety relating to fire protection efforts used to evaluate risk; providing online nondownloadable software for providing information and analytics about insurance and insurance claims; providing online nondownloadable software for analysis of insurance information and identification and detection of insurance fraud and abuse; providing online nondownloadable software for use in insurance claims management; providing an interactive website featuring technology that allows users to access and download information, analysis and reports on fire protection efforts to assist communities with evaluating fire risk; providing online, non-downloadable software for use by property and casualty insurance companies for insurance claims management, compliance and reporting; providing online, non-downloadable software for the purpose of review and verification of Medicaid and Medicare eligibility status and related information; providing temporary use of web-based non-downloadable software for use in analyzing and manipulating data for generating presentations and charts in the field of insurance;

providing online, non-downloadable software for use by property and casualty insurance companies to create databases of insurance statistics and insurance claims information, to identify, analyze, and evaluate claims, and to develop plans for settlement of claims; providing online, non-downloadable software for creating diagrams of accidents and evaluating the potential for subrogation; providing aerial, terrestrial and satellite imagery, and geospatial information and analysis, relating to building structures, roofs, other features of building structures, property, and terrain; providing geographic information and measurement information through the collection, manipulation, processing, and/or formatting of images and geographic measurements of geographic locations; providing computer representations of geographic locations created from aerial, terrestrial, satellite and geospatial imagery and other imagery and remote sensing technologies; providing three dimensional imagery and computer modeling relating to measurements and images of building structures, roofs, other features of building structures, property, terrain and other objects and conditions; remote measuring services for building structures, roofs, property, other features of building structures, terrain, and other objects and conditions, using aerial, terrestrial, satellite and geospatial imagery and other imagery, other remote sensing technologies, and computer software; providing aerial, terrestrial and satellite imagery, and geospatial information and analysis, relating to building structures, roofs, other features of building structures, property, and terrain, and to risk associated with and damage caused by weather, natural hazards, and natural disasters, for use in building inspections, risk assessment, hazard assessment, reconstruction assessment, and to assist in insurance claims management and analysis; providing online nondownloadable software for cost estimating and other assessments in the building, construction, repair, restoration, maintenance and remodeling industries; providing online nondownloadable software for detecting, identifying, measuring and analyzing roofs, building structures, property, terrain, and other objects and conditions; providing online nondownloadable software for use in connection with aerial, terrestrial, satellite and geospatial imagery and other imagery and remote sensing technologies, and with photographic data, geospatial data, locational data, and other information and data in connection with remote sensing technologies; providing online nondownloadable software for creating drawings, floorplans, and schematics of building structures, roofs, other features of building structures, property terrain and other objects and conditions; providing online nondownloadable software for integrating electronic data and other information with real world environments; providing online nondownloadable software for integrating electronic data and other information with real world environments for the purpose of generating maps, representations of building structures, roofs, other features of building structures, property, terrain and other objects and conditions; providing online nondownloadable software for use in providing information featuring aerial, terrestrial, satellite and geospatial imagery and other imagery and remote sensing technologies and photographic data, geospatial data, locational data, and other information and data generated in connection with remote sensing technologies; providing online nondownloadable software for photogrammetric analysis; providing online nondownloadable software for use in detection, inspection, evaluation and assessment of buildings and other objects and conditions; providing online nondownloadable software for risk assessment, analysis and management and hazard assessment, analysis and management; providing nondownloadable software to assist in insurance claims assessment, analysis and management; providing online nondownloadable software for capturing, storing, management, processing and transmitting photos, videos and other sensory and detection information; providing online nondownloadable software used for capturing, storing and accessing images and geographic, locational and other data regarding the captured, stored and accessed images; providing an interactive website featuring technology that allows users to order and view imagery, map images, and geospatial data; providing an interactive website featuring technology that allows users to access information, imagery, and analysis relating to building structures, roofs, other features of building structures, property, terrain, other objects and conditions, weather, climate, and natural disasters; providing an interactive website featuring technology that allows users to access information, imagery, and analysis relating to fraud detection, assessment of energy efficiency, analysis of infrastructure, analysis of electrical utilities

infrastructure, forensic analysis, geographical information systems and risk assessment, risk detection, risk analysis, and risk management; providing an interactive website featuring technology that allows users to access information, imagery, and analysis relating to natural resources, energy, energy efficiency, electrical utilities infrastructure, agriculture, geopolitics, mining, transportation, supply chain, engineering, cartography, insurance, banking, construction, real estate, law enforcement, emergency services, government, astronomy and space exploration, weather, and climate; providing an interactive website featuring technology that allows users to access information, imagery, and analysis relating to fraud detection, assessment of energy efficiency, analysis of infrastructure, analysis of electrical utilities infrastructure, forensic analysis, geographical information systems and risk assessment, risk detection, risk analysis, and risk management; remote measuring and electronic imaging of features of building structures, roofs, other features of building structures, property, and terrain, gathered by manned and unmanned aerial systems; providing online nondownloadable software for use in analysis, predictive modeling, and creating reports, relating to property damages, loss information catastrophic loss information, climate, weather events, catastrophes, and other events and conditions; providing information and analysis using aerial, terrestrial, and satellite imagery and other remote sensing technologies relating to landscapes and the environment, and changes and risks associated therewith, in the field of insurance; providing online nondownloadable software for controlling imaging and other sensory and detection apparatus and technologies; providing an interactive website featuring technology that allows users to access, review, comment on, receive training on, and provide feedback on, software and services in the field of insurance and conduct interactive discussions in the field of insurance; providing online non-downloadable software for use in valuations of real estate, buildings, fixtures, personal property and other objects; providing online nondownloadable software for documenting, inventorying, and monitoring personal, commercial, and industrial property and other objects and any damage thereto and status, condition, value and location thereof; providing online nondownloadable software for communicating with insurance policyholders and insurance industry professionals, for providing and tracking customer surveys and for estimating the costs of insurance, construction, engineering, remodeling or replacement of residential, commercial, industrial and agricultural buildings and the fixtures and contents thereof; providing online nondownloadable software, namely, graphic based construction estimation software, which estimates the cost of building or repairing structures and other objects; providing online nondownloadable software, namely, cost estimation, project management and analytic reporting software; providing online nondownloadable software for identifying, estimating and valuing insuring, remodeling, replacement and construction costs; providing online nondownloadable software featuring information and analytics regarding weather, hazards and other events and conditions; providing on-line searchable databases with information and analysis about weather, climate, and natural weather hazards to assist in insurance claims management and analysis; providing online non-downloadable software for creating reports about weather, climate, and natural hazards; providing online non-downloadable software for creating maps; electronic storage services, namely, storing data for others relating to insurance claims, valuations of real estate, buildings, fixtures, and personal property, and construction, replacement and remodeling costs estimates; electronic storage services, namely, storing data for others in the fields of residential, commercial, industrial and agricultural real estate valuations, construction, replacement and remodeling costs estimates; electronic storage services, namely, storing data relating to residential insurance valuation calculations; electronic storage services, namely, storing data on insurance claims that involve damages to real property, home warranties, valuations of real estate and buildings, and insurance policies covering real estate; electronic storage services, namely, storing data from aerial, terrestrial, satellite and other imagery and remote sensing technologies, photographic data and geospatial data; providing online non-downloadable software for education and training in the fields of insurance cost valuation and residential construction and remodeling; providing online non-downloadable software for identifying documenting, inventorying, and monitoring personal, commercial, and industrial property and other objects and any damage thereto and status, condition, value and location thereof; providing online non-

downloadable software for calculating the costs of repairs and for monitoring of claims under home warranties and building insurance policies; providing online non-downloadable software for calculating the costs of, tracking the progress and payments of, and reporting personal property claims; technical research for the development of industry standards relating to imagery and geospatial intelligence and analysis, and use of manned and unmanned aerial vehicles and related technology; providing technology information relating to geospatial imagery and geospatial intelligence and analysis, and manned and unmanned aerial vehicles and related technology; providing on-line databases featuring information and analytics on weather, climate and natural hazards; providing an interactive website featuring technology that enables creation of customized reports and analytical documents delivered electronically featuring information and analytics on weather, climate and natural hazards; providing on-line, non-downloadable software for creating and viewing reports and maps about weather, climate and natural hazards; providing a website featuring non-downloadable software for creating and viewing reports and maps; providing online nondownloadable software for the operation of unmanned aerial systems; providing online nondownloadable software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, and aerial, terrestrial, satellite, and geospatial imagery and other imagery and outputs from sensory and detection technologies; providing online nondownloadable software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, and aerial, terrestrial, satellite, geospatial and other imagery and outputs from sensory and detection technologies in the fields of in the fields of energy and natural resources, agriculture, mining, transportation, supply chain, engineering, weather and climate, cartography, insurance, banking, construction, real estate, law enforcement, emergency services, government, astronomy and space exploration and geopolitics; providing online nondownloadable software for capturing, generating, taking, viewing, storing, editing, arranging, converting, combining, sharing, downloading, enhancing, providing, accessing, annotating, transmitting, manipulating, processing, analyzing, maintaining, searching, managing, displaying, detecting, reproducing, modifying and otherwise interacting with or utilizing information, data, aerial, terrestrial, satellite, and geospatial imagery and other imagery and outputs from sensory and detection technologies in connection with fraud detection, assessment of energy efficiency, analysis of infrastructure, analysis of electrical utilities infrastructure, forensic analysis, geographical information systems and risk assessment, risk detection, risk analysis, and risk management; providing online, non-downloadable software for searching, organizing, analyzing, processing, managing, categorizing, creating and editing insurance and financial documents; electronic storage services, namely, storing electronic documents in the fields of insurance and finance; providing a website featuring technology that allows users to search, organize, analyze, process, manage, categorize, create and edit insurance and financial documents in the nature of coverage forms, endorsements, schedules, and other insurance and financial forms, using database information; providing a website featuring technology for on-line collaboration in the fields of technology, use of imagery, geospatial intelligence and analysis, manned and unmanned aerial vehicles and related technology, insurance, real estate, building and construction, climate, catastrophes, weather events and issues, energy, natural resources, geopolitics, agriculture, and products, consulting and services related thereto; electronic storage services, namely, storing data for others relating to insurance claims, compliance and reporting; electronic storage services, namely, storing data for others relating to review and verification of Medicaid and Medicare eligibility status and related information

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

CLASS 45: Providing information about court cases relating to insurance via email; providing a website featuring summaries and reviews of court cases relating to property and casualty insurance; fraud detection services in the field of insurance; reviewing standards and practices to determine and evaluate compliance with and enforcement of laws, statutes, ordinances, regulations and standards impacting the insurance industry; providing a website featuring information about insurance fraud and abuse; investigation services related to insurance claims, namely, providing an interactive website notifying insurers by electronic message notification about insurance fraud and abuse; providing information on and analysis of fire protection efforts to assist communities with evaluating fire risk; providing electronic reports with information on and analysis of fire protection efforts via a global computer network; providing ratings information relating to fire protection efforts used to evaluate fire risk; providing information relating to legal affairs, namely, providing emails, electronic reports and databases reporting on laws and regulations impacting the insurance industry; providing information on and analysis of fire protection efforts to assist communities with evaluating safety; providing online information in the form of electronic reports on and analysis of fire protection efforts via a global computer network; providing ratings information, namely, ratings of safety relating to fire protection efforts used to evaluate insurance risk; providing links to the websites of others featuring information about insurance law and state laws

FIRST USE 6-1-2016; IN COMMERCE 6-1-2016

The mark consists of the design of a stylized "V" superimposed on a circle background with horizontal lines followed by the word "ISO".

OWNER OF U.S. REG. NO. 2368227, 2662173, 2673902

SER. NO. 87-071,523, FILED 06-14-2016

**REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION**

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**
