

United States of America

United States Patent and Trademark Office

Reg. No. 5,964,921

Registered Jan. 21, 2020

Int. Cl.: 7, 9

Trademark

Principal Register

Bimba Manufacturing Company (DELAWARE CORPORATION)
25150 South Governors Highway
University Park, ILLINOIS 60484

CLASS 7: Valves being parts of machines; Pneumatically controlled valves, namely, pneumatic directional and flow control valves for use in automated production machinery; Hydraulically controlled valves, namely, hydraulic directional and flow control valves for use in automated production machinery; Check valves; Actuators for valves, namely, linear, hydraulic and pneumatic actuators; Rotary actuators being pneumatic and hydraulic valve actuators; Pneumatically and hydraulically controlled devices being grippers for use in pneumatic and hydraulic devices for the purposes of picking up and placing objects, transferring material, clamping objects, and indexing objects; Vacuum robotics and tools, namely, vacuum cups as parts of machines; Vacuum pumps; Pumps, namely, compressed air pumps and hydraulic pumps; Hydraulic fluid filters for mechanical purposes; Air filters for mechanical purposes; Filters for cleaning cooling air, for machines; Lubricating equipment for use in machines; Pressure switches for monitoring, controlling and switching pneumatic or hydraulic systems; Positioners in the nature of pneumatic and hydraulic controller devices for controlling movement of automated production machinery; Miniature pneumatic components, namely, pneumatic control systems comprised of cylinders for machines, valves as machine components and also including manifolds; Noise attenuation pump, actuator and valve silencers being exhaust silencers for machines; Cylinders for machines; Pressure regulators being parts of machines; Air compressors; Pistons for use with cylinders for machines; Mufflers for pneumatic and hydraulic devices in the nature of hydraulic and pneumatic mufflers for use in noise suppression of machinery; Air preparation devices, namely, pneumatic air preparation units and parts thereof for use in pneumatic machinery for conditioning compressed air; Pressure sensors for monitoring pneumatic and hydraulic systems; Pressure sensors for managing fluid powered systems and machines involved in factory automation, namely, for monitoring hydraulic or pneumatic fluid systems involved in factory automation; Pneumatic tubing namely, tubes used in machines to convey material via compressed air or vacuum; Hydraulic controls for machines; replacement parts for the aforesaid

Andrei Iancu

Director of the United States
Patent and Trademark Office

FIRST USE 3-1-2010; IN COMMERCE 3-1-2010

CLASS 9: Electronic valves for controlling gas, liquids or fluids; Solenoid valves; Control valves for regulating the flow of gases and liquids; Safety valves being parts of machines for flow shutoff in machines; Accessories for fire pumps, electric actuators, and automatic valves, namely, connection manifolds; Automatic inlet control valve parts, namely, mounting

manifolds for control systems; Electric actuators; Electric switches; Downloadable software for machine control; Downloadable software for managing fluid powered systems and machines involved in factory automation; Electronic control apparatus and instruments for controlling pneumatic and hydraulic systems in the nature of pneumatic and hydraulic machines; Pressure and temperature sensors; Electric valve actuator parts, namely, electronic and digital positioners for machines; Flow controls for fluid handling machines and equipment in the nature of automatic liquid flow control machines; Electronic controls for motors; Pressure regulators and flow rate and pressure indicators in the nature of pressure gauges, pressure indicators and pressure measuring apparatus for the production, processing or treatment of compressed air or other compressed gasses; Flow gauges in the nature of pressure gauges; Electronic controls for motors and machines; Vacuum gauges; Power switches; cylinders being automatic liquid-flow control machines; Temperature sensors for managing fluid powered systems and machines involved in factory automation, namely, for monitoring hydraulic or pneumatic fluid systems involved in factory automation; replacement parts for the aforesaid

FIRST USE 3-1-2010; IN COMMERCE 3-1-2010

The mark consists of a concentric circle encircling an inner, circular area and a horizontal banner across the inner, circular area. The banner contains the letters "B", "I", "M", "B" and "A" in all upper case letters.

OWNER OF U.S. REG. NO. 2050733, 3334723, 4002422

SER. NO. 88-226,622, FILED 12-12-2018

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
