Subject: RE: Application Serial No. 88276366

Dear Christina,

Thanks again for your email.

I think that "electronic components of security systems" is an accurate descriptor to append to the Class 009 goods. If that solves the problem(s), can you make an Examiner's Amendment? Please let me know.

Yours,

Adam

Good morning.

Thank you for your response.

The wording as suggested “Electronic surveillance apparatus, namely electromagnetic spectrum surveillance apparatus in the nature of mobile electronics” is still indefinite because it only specifies the nature of the goods however, not the type of goods which is required. Additionally, the goods “mobile electronics” may be incongruous with the nature of the goods “electronic surveillance apparatus” without further specification. The ID Manual provides further guidance.

The applicant must specify the type of electronic surveillance apparatus for example, electronic security tags and labels, etc.

Class 9: Electronic surveillance apparatus, namely electromagnetic spectrum surveillance apparatus **in the nature of {indicate type of goods, e.g., electronic security tags and labels, acoustic tags, magnetic tags, electronic components of security systems, etc.}**

If you have any questions, please feel free to contact me.

Sincerely,

Christina Calloway

Dear Christina,

Thanks for your email and please excuse the tardiness of my reply – I've been traveling.

I think the IDs are close, but still need a little work. What do you think of the following, taken with the remainder of the services listed in the IDs in our recent filing?

Class 9: Electronic surveillance apparatus, namely electromagnetic spectrum surveillance apparatus in the nature of mobile electronics ; Mobile radio receiving apparatus , namely, mobile radios

Class 45: Electronic monitoring services for security purposes in the field of electromagnetic spectrum receiving and analysis , namely, monitoring of drones for protecting tangible property

Yours,

Adam

Subject: Re: Application Serial No. 88276366

This email is intended for Adam J. Cermak and/or any authorized party

United States Trademark Application Serial No. 88276366

Dear Mr. Cermak,

I am the assigned trademark examining attorney for the above-referenced application. The application will be ready to proceed once applicant agrees to modify the identification of goods and services. The services identified in International Class 45 must identify physical security services of people or tangible property; thus, the wording "electronic monitoring of the electromagnetic spectrum" does not indicate security services for tangible property thus such services would be classified in another international class and the wording "

detecting drones” does indicate a monitoring service. If the changes below are acceptable, I will issue an examiner's amendment accordingly (changes required are bolded and only the class entries requiring amendment have been included for brevity):

Class 9: Electronic surveillance apparatus, namely electromagnetic spectrum surveillance apparatus **in the nature of {indicate type of goods, e.g., electronic security tags and labels, acoustic tags, magnetic tags, electronic components of security systems, etc.}** ; Mobile radio receiving apparatus , **namely, mobile radios**

Class 45: Electronic monitoring services for security purposes **in the field of** electromagnetic spectrum , **namely, monitoring of drones for protecting personal property**

Please let me know by phone or email if you agree to allow me to correct the above by an examiner's amendment or if you have any questions about the application.

Sincerely,

Christina Calloway
