BYTA BITES

Hi Paul,

We have heard from the client on this mark and my understanding is that the proposed translation

“The English translation of “BYTA” in the mark is “CHANGE”.

Is acceptable, and that the client would like to delete “containers” so that the ID reads:

Class 21: ~~containers;~~ Containers for household use; Household containers for food; Insulated containers for food and beverages

As I understand these are the only issues, can you enter via EA? Many thanks!

Best,

Kim
