BLACKBERRY

Reg. No. 6,144,917

Registered Sep. 08, 2020

Int. Cl.: 9

Trademark

Principal Register

BLACKBERRY LIMITED (CANADA CORPORATION)
2200 University Avenue East
Waterloo, Ontario, CANADA N2K0A7

CLASS 9: Downloadable computer software for cybersecurity, detecting and mitigating network attacks using artificial intelligence, machine learning and/or deep learning; downloadable computer software for continuous monitoring, identifying, verifying, analyzing, comparing, classifying, sorting and scoring of collected or acquired data from network traffic, network communication, network flow data, and network intercommunication using artificial intelligence, machine learning and/or deep learning; downloadable computer software for providing initiation, distribution, delivery and response tracking of emergency notifications to users via personal communication devices and public mass communication devices; downloadable computer software for supporting exchange of information and collaboration processes amongst organizations and people during emergency and crisis situations; downloadable computer software for the purposes of data collection, monitoring, and mass notification services for managing emergency, and crisis and business critical situations and improving crisis communications capability; downloadable computer software for the secure transmission of mass notification emergency information via audio, video and electronic communications networks and devices, including social networks; downloadable computer software for managing and analyzing data feeds and data inputs in the field of crisis reporting, communication and management, and for sending notifications through multiple IP network channels and delivery services; downloadable computer software for loading data from personnel directories, and managing users for purpose of crisis communication; downloadable computer software for managing organization directories and connections across organizations for the purpose of connecting them and facilitating collaboration before, during and after crisis situations; downloadable computer software for locating personnel for security and safety purposes using a global positioning system, user self-reporting, and other locating means; downloadable computer software for electronically monitoring, detecting and reporting on alarms, alerts, emergencies, hazards, security threats, and dangerous weather; downloadable computer software for notifying individuals and organizations of a changed status or condition of a sensing device or input feed via network based message alerts; downloadable software in the nature of a mobile application for sending, receiving, confirming and responding to alerts, messages, and notifications via wireless communications networks or the Internet; downloadable computer software in the nature of desktop software applications for providing desktop notifications that capture the user's attention with audio-visual signals and allow users to confirm, respond to notifications or receive additional information related to notifications; downloadable computer software for use in threat prevention, detection, investigation, response, remediation and analysis for computers, computer systems, servers, computer networks, endpoints, mobile devices, enterprise of things (EOT) and internet of things (IoT) enabled devices; computer software for managing computer network endpoint security and predicting and monitoring security

Andrei Iancu

Director of the United States
Patent and Trademark Office

threats to computer networks; downloadable computer operating system programs; downloadable computer software for performing data security functions in the field of cryptographic network security; downloadable computer software for automating a process for authentication of identity using existing databases in connection with the issuance and management of digital certificates used for authentication or encryption of digital communications over the Internet and other computer networks; downloadable computer software, namely, encryption software to enable secure transmission of digital information; downloadable computer software to integrate managed security, namely, virtual private network (VPN), public key infrastructure (PKI), digital certificate issuance, verification and management; cloud computing software; downloadable Internet of things (IOT) management software platform consisting of downloadable cloud-based software, mobile and desktop applications, and premise-based gateway agent software; downloadable computer software for use in managing device-to-device, device-to-cloud and cloud-to-device communications; downloadable computer software for machine-to-machine (M2M) communication, remote data collection and process control; downloadable computer software for asset tracking; downloadable computer software to track and manage IP-enabled machines and other connected devices; downloadable software Development Kits (SDKs), Application Programming Interface (API) software, and Enterprise Application Integration (EAI) software for creating software and applications related to machine to machine (M2M) devices, network and Internet connected devices, and IOT devices; downloadable computer software for sending, receiving and analyzing data from network and Internet-connected devices; downloadable computer software, namely, software and middleware used to allow software applications to interface with mobile and remote devices and to allow connectivity, memory storage, and device management, all via a computer network; downloadable computer software and hardware for fleet asset tracking in the transportation industry; downloadable computer software and hardware for tracking and managing IP-enabled machines; downloadable computer software and hardware to collect, filter and process electronic data, namely, audio, voice, video, images, text, electronic mail and messaging, documents, and vehicle and driver telematics and analytics concerning driver behavior, vehicle diagnostics, maintenance, performance, location, and downtime; downloadable computer software systems for use in dispatch, video monitoring, driver compliance, driver performance, driver scorecards, document management, trailer tracking, asset tracking, vehicle tracking, telematics, fuel economy tracking, driver workflow, integrations with third party software, vehicle utilization, temperature tracking, vehicle inspection reports; mobile phones, smart phones, tablet computers and wireless communication devices for voice, data, or image transmission; accessories for mobile phones, smart phones, tablet computers and wireless communication devices, namely, headsets and earphones, phone chargers, battery chargers, mounts, cradles and holders for hands-free phone use, charging and docking stations, cell phone and tablet computer protective cases, protective covers and cases for handheld electronic devices, cell phone holsters, and speakers; downloadable computer software for mobile phones, portable media players, and handheld computers, namely, software for sending digital photos, videos, images, and text to others via the global computer network; downloadable computer software in the fields of Mobile Device Management (MDM), Mobile Applications Management (MAM), Mobile Security Management (MSM), Mobile Information Management (MIM), and mobile Identity and Access Management (IAM); downloadable computer software to allow network administrators to monitor, manage, and quarantine devices that are granted access to a network

FIRST USE 7-00-1999; IN COMMERCE 7-00-1999

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

OWNER OF U.S. REG. NO. 4388321, 4916352, 5692085, 2844340, 4489896

SER. NO. 88-530,399, FILED 07-23-2019

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
