Subject: RE: US TM application for GUARDIAN - SN 97006855 - One MINOR Issue

One quick thought – I want to add METAL before vent covers to make it clear those goods are in fact in Class 6 as well. This is the proposed ID – please let me know if this is acceptable as well:

*“Metal flame and ember resistant vents, flame-resistant vent screens, and **metal** vent covers, all for fire protection use in attic and crawl spaces to prevent flames and burning embers from entry into homes” in International Class 6.*

Please note that non-metal vent covers are properly classified in Class 19. Thanks –

Karen
