INTELLECTUAL PROPERTY SECURITY AGREEMENT

This Intellectual Property Security Agreement is entered into as of July 2, 2002 by and between SILICON VALLEY BANK ("Bank") and GRACENOTE, INC. f/k/a CDDDB, Inc. ("Grantor").

RECITALS

A. Bank has agreed to make certain advances of money and to extend certain financial accommodation to Grantor (the "Loans") in the amounts and manner set forth in that certain Loan and Security Agreement by and between Bank and Grantor dated as of even date herewith (as the same may be amended, modified or supplemented from time to time, the "Loan Agreement"; capitalized terms used herein are used as defined in the Loan Agreement). Bank is willing to make the Loans to Grantor, but only upon the condition, among others, that Grantor shall grant to Bank a security interest in certain Copyrights, Trademarks, Patents, and Mask Works to secure the obligations of Grantor under the Loan Agreement.

B. Pursuant to the terms of the Loan Agreement, Grantor has granted to Bank a security interest in all of Grantor's right, title and interest, whether presently existing or hereafter acquired, in, to and under all of the Collateral.

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, and intending to be legally bound, as collateral security for the prompt and complete payment when due of its obligations under the Loan Agreement, Grantor hereby represents, warrants, covenants and agrees as follows:

AGREEMENT

To secure its obligations under the Loan Agreement, Grantor grants and pledges to Bank a security interest in all of Grantor's right, title and interest in, to and under its Intellectual Property Collateral (including without limitation those Copyrights, Patents, Trademarks and Mask Works listed on Schedules A, B, C, and D hereto), and including without limitation all proceeds thereof (such as, by way of example but not by way of limitation, license royalties and proceeds of infringement suits), the right to sue for past, present and future infringements, all rights corresponding thereto throughout the world and all re-issues, divisions continuations, renewals, extensions and continuations-in-part thereof.

This security interest is granted in conjunction with the security interest granted to Bank under the Loan Agreement. The rights and remedies of Bank with respect to the security interest granted hereby are in addition to those set forth in the Loan Agreement and the other Loan Documents, and those which are now or hereafter available to Bank as a matter of law or equity. Each right, power and remedy of Bank provided for herein or in the Loan Agreement or any of the Loan Documents, or now or hereafter existing at law or in equity shall be cumulative and concurrent and shall be in addition to every right, power or remedy provided for herein and the exercise by Bank of any one or more of the rights, powers or remedies provided for in this Intellectual Property Security Agreement, the Loan Agreement or any of the other Loan

Documents, or now or hereafter existing at law or in equity, shall not preclude the simultaneous or later exercise by any person, including Bank, of any or all other rights, powers or remedies.

IN WITNESS WHEREOF, the parties have cause this Intellectual Property Security Agreement to be duly executed by its officers thereunto duly authorized as of the first date written above.

EXHIBIT B
Patents and Applications.

- (1) **U.S. Patent No. 6,230,192 – Method and system for accessing remote data based on playback of recordings, issued May 8, 2001.** Relates to using a recording as a password to access a remote device via a computer network. An identifier is determined for the recording and the link to the remote device is based on the identifier.
- (2) **U.S. Patent No. 6,230,207 – Network delivery of interactive entertainment synchronized to playback of audio recordings, issued May 8, 2001.** Relates to features including interactively synchronizing the display of information from a remote device with the playback of a recording at a local device.
- (3) **U.S. Patent No. 6,240,459 – Network delivery of interactive entertainment synchronized to playback of audio recordings, issued May 29, 2001.** Relates to features including a playback system that compares the playback position of a recording with timing information received via a network from a database system to determine whether to request a new display segment from the database system.
- (4) **U.S. Patent No. 5,987,525 - Network delivery of interactive entertainment synchronized to playback of audio recordings, issued November 16, 1999.** Covers features including synchronizing visual content with the playback of a musical recording at a local computer that receives the visual content from a remote computer.
- (5) **U.S. Patent No. 6,154,773 - Network delivery of interactive entertainment complementing audio recordings, issued November 28, 2000.** Expanded the claims of synchronization Patent 5,987,524. Relates to features including synchronizing visual content with playback of a musical recording at a local computer that receives the visual content from a remote computer.
- (6) **U.S. Patent No. 6,061,680 – Method and system for finding approximate matches in database, issued May 9, 2000.** Relates to a method used to find title and track information in a database by calculating approximate length information based on the number and length of tracks on a recording.
- (7) **U.S. Patent No. 6,161,132 - System for synchronizing playback of recordings and display by networked computer systems, issued December 12, 2000.** Relates to a method of using a first device to control playback of a recording at one or more second devices connected to the first device via a network and transmitting output data related to the recording between the first and second devices.

- (8) **U.S. Patent No. 6,330,593 - System for Collecting Use Data Related to Playback of Recordings, issued December 11, 2001.** Relates to entertainment content complementary to a musical recording that is delivered to a user's computer by means of a computer network link. The user employs a browser to access the computer network. A plugin for the browser is able to control an audio CD or other device for playing the musical recording. A script stored on the remote computer accessed over the network is downloaded. The script synchronizes the delivery of the complementary entertainment content with the play of the musical recording.
