AGREEMENT**

This AMENDED AND RESTATED INTELLECTUAL PROPERTY SECURITY AGREEMENT (this "*IP Security Agreement*") dated February 12, 2010, is made by the Persons listed on the signature page hereof (the "*Grantors*"), each a debtor and debtor-in-possession under chapter 11 of the Bankruptcy Code, in favor of Citibank, N.A., as administrative agent (the "*Administrative Agent*") for the lenders as defined in the Credit Agreement referred to below.

WHEREAS, Chemtura Corporation, a Delaware corporation and a debtor and debtor-in-possession under chapter 11 of the Bankruptcy Code, has entered into an Amended and Restated Senior Secured Superpriority Debtor-In-Possession Credit Agreement dated as of February 3, 2010 (as amended, amended and restated, supplemented or otherwise modified from time to time, the "*Credit Agreement*"; the terms defined therein, unless otherwise defined herein, being used herein as therein defined) among the other Grantors, each a debtor and debtor-in-possession under chapter 11 of the Bankruptcy Code, Citibank, N.A., as Administrative Agent and Initial Issuing Bank, the other agents named therein, and the Lenders party thereto from time to time.

WHEREAS, the Grantors and certain other Persons have executed and delivered the Credit Agreement made by the Grantors and such other Persons to the Administrative Agent.

WHEREAS, under the terms of the Credit Agreement, the Grantors have granted to the Administrative Agent, for the ratable benefit of the Secured Parties, a security interest in the Additional Collateral (as defined in Section 1 below) of the Grantors and have agreed to execute this IP Security Agreement for recording with the U.S. Patent and Trademark Office, the United States Copyright Office and other governmental authorities in accordance with the terms of the Credit Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Grantors agree as follows:

SECTION 1. Grant of Security. Each Grantor hereby grants to the Administrative Agent, for the ratable benefit of the Secured Parties, a security interest in all of such Grantor's right, title and interest in and to the following (the "*Collateral*"):

- (a) all patents, patent applications, utility models and statutory invention registrations, all inventions claimed or disclosed therein and all improvements thereto, as set forth in Schedule A hereto (the "*Patents*");
- (b) all trademarks, service marks, domain names, trade dress, logos, designs, slogans, trade names, business names, corporate names and other source identifiers, whether registered or unregistered (provided that no security interest shall be granted in United States intent-to-use trademark applications to the extent that, and solely during the

period in which, the grant of a security interest therein would impair the validity or enforceability or result in the voiding of such intent-to-use trademark applications under applicable federal law), together, in each case, with the goodwill symbolized thereby, as set forth in Schedule B hereto (the “*Trademarks*”);

(c) all copyrights, including, without limitation, copyrights in Computer Software, internet web sites and the content thereof, whether registered or unregistered, as set forth in Schedule C hereto (the “*Copyrights*”);

(d) all tangible embodiments of the foregoing, all rights in the foregoing provided by international treaties or conventions, all rights corresponding thereto throughout the world and all other rights of any kind whatsoever of such Grantor accruing thereunder or pertaining thereto;

(e) any and all claims for damages and injunctive relief for past, present and future infringement, dilution, misappropriation, violation, misuse or breach with respect to any of the foregoing, with the right, but not the obligation, to sue for and collect, or otherwise recover, such damages; and

(f) any and all proceeds of, collateral for, income, royalties and other payments now or hereafter due and payable with respect to, and supporting obligations relating to, any and all of the foregoing or arising from any of the foregoing.

SECTION 2. Security for Obligations. The grant of a security interest in the Additional Collateral by the Grantors under this IP Security Agreement secures the payment of all Obligations of the Grantors now or hereafter existing under or in respect of the Loan Documents, whether direct or indirect, absolute or contingent, and whether for principal, reimbursement obligations, interest, premiums, penalties, fees, indemnifications, contract causes of action, costs, expenses or otherwise (all such Obligations being the “*Secured Obligations*”).

SECTION 3. Recordation. The Grantors authorize and request that the Register of Copyrights, the Commissioner for Patents and the Commissioner for Trademarks and any other applicable government officer to record this IP Security Agreement .

SECTION 4. Grants, Rights and Remedies. This IP Security Agreement has been entered into in conjunction with the provisions of the Credit Agreement. The Grantors do hereby acknowledge and confirm that the grant of the security interest hereunder to, and the rights and remedies of, the Administrative Agent with respect to the Additional Collateral are more fully set forth in the Credit Agreement, the terms and provisions of which are incorporated herein by reference as if fully set forth herein.

SECTION 5. Governing Law. This IP Security Agreement shall be governed by, and construed in accordance with, the laws of the State of New York and to the extent applicable, the Bankruptcy Code.

SECTION 6. Execution in Counterparts. This IP Security Agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

IN WITNESS WHEREOF, the parties have caused this IP Security Agreement to be duly executed and delivered by their respective officers thereunto duly authorized, as of the date first above written.
