Digital In-Use VerificationSM

Digital In-Use Verification Information

Selected federal trademark records in this report include a section entitled "*Digital Verification*SM." This section is developed using Corporation Service Company's patent-pending Digital In-Use VerificationSM service, which provides enhanced online information regarding Federal trademark records. Digital Verification information includes:

1. Owner Link: A link to the web site of the current owner of the mark
2. In-Use Link: A link to a web page showing actual commercial use of the mark
3. In-Use Screen Capture: A screen shot of the web page showing commercial use of the mark, captured on the date the search is completed

To maintain a focused report and reasonable page length, the *Digital In-Use Verification*SM service is only applied on the most relevant marks listed in the report. For all records on which the service has been applied, a *Digital Verification* section will be displayed. If the service is unable to locate either the Owner or In-Use Link, the message "No online reference located" will be displayed. Records that do not include the service will not display a Digital Verification section.

Disclaimer:

The *Digital In-Use Verification*SM service uses Corporation Service Company's proprietary web crawling and analysis technology in combination with human review to locate relevant online federal trademark information. The search results included in this section of the search report are a selection of the information available at the time of the preparation of this report, and are not a comprehensive representation of the Web. Because of the dynamic nature of the Internet, Corporation Service Company cannot warrant that the service will display accurate, complete or current information. In addition, any of the Web links included in your search report may become unavailable at any time following the preparation of this report. Due to the nature of the Web, and because we do not filter Web content, it is possible that this report may contain objectionable material.

Owner Link Disclaimer:

The **Owner Link** feature identifies marks within the report with commonalities between owner information. Federal, State, Common Law and other third-party data owner information is based on exact matches, excluding generic business designations (Inc., Corp., LLC, etc.). Inconsistencies in the data from suppliers and/or third party sources (i.e., USPTO, State, etc.) may impact results. Because data from third-party sources may be incomplete or out-of-date, Corporation Service Company cannot warrant that information contained in these sections is timely, complete, or error-free. Internet owner information is based on the WHOIS information associated with the root domain name listed in the record. Because of the dynamic, unorganized nature of Internet content, Corporation Service Company cannot warrant that the service will display accurate, complete, or current information.

Owner Information Disclaimer:

Owner information provides business information about the last reported owner of a trademark, based on a matching of USPTO, State and certain common law trademark records and any business information associated with the trademark owner. The search results included in this section of the report are a selection of the information available at the time of the preparation of this search report. We do not guarantee the accuracy of such matching nor the accuracy of the business information provided by our suppliers and/or third party sources. Any of the internet links included in this search report may become unavailable at any time following the preparation of this report.

Comments

The results in this report were generated from the queries set forth above. Where appropriate, individual queries are submitted using wildcard operators, exact only restrictions, and limitations on record status type (e.g., active, inactive), goods/services description, or International Class. Preliminary applications may initially be received from the USPTO without mark drawing or design codes, or pseudo marks, and are updated to our database as they are made available.

Any relevant U.S. designated Madrid filings which have been incorporated into the USPTO database (79 Series records) are included in the Federal section of this report. 79 Series records are identified with the  symbol in the Federal Trademark Summary.

After execution of the search strategy set forth above, the following records were selected as the most relevant for inclusion in your report.

WIPO International Register

Database Information

Database Searched	The International Register (IR) Trademark Database contains trademark records filed with The International Bureau (IB) of The World Intellectual Property Organization via the authorization of the Madrid Agreement and Protocol Concerning the International Registration of Marks.
Coverage	1893 - current
Update Frequency	Updated weekly, with status updates within one week of publication.

Search Overview:

This section of your report includes IR filings which have sought protection in the United States under the Madrid Protocol. Any records presented herein may also be displayed in the Federal section of this report, as the USPTO incorporates US-designated Madrid filings into their data.

Disclaimer:

This section of the report is designed to uncover trademark records from the IR which have the potential to conflict with the requested target Mark and corresponding Goods/Services. Because data from third-party sources may be incomplete or out-of-date, Corporation Service Company cannot warrant that the information in this section is timely, complete, or error-free.

Owner Link Disclaimer:

The Owner Link feature identifies marks within the report with commonalities between owner information. Federal, State, Common Law and other third-party data owner information is based on exact matches, excluding generic business designations (Inc., Corp., LLC, etc.). Inconsistencies in the data from suppliers and/or third party sources (i.e., USPTO, State, etc.) may impact results. Because data from third-party sources may be incomplete or out-of-date, Corporation Service Company cannot warrant that information contained in these sections is timely, complete, or error-free. Internet owner information is based on the WHOIS information associated with the root domain name listed in the record. Because of the dynamic, unorganized nature of Internet content, Corporation Service Company cannot warrant that the service will display accurate, complete, or current information.

Owner Information Disclaimer:

Owner information provides business information about the last reported owner of a trademark, based on a matching of USPTO, State and certain common law trademark records and any business information associated with the trademark owner. The search results included in this section of the report are a selection of the information available at the time of the preparation of this search report. We do not guarantee the accuracy of such matching nor the accuracy of the business information provided by our suppliers and/or third party sources. Any of the internet links included in this search report may become unavailable at any time following the preparation of this report.

On the date this search was completed, no US-designated filings were located in the IR database relevant to your mark.
