Assignment of Intellectual Property Rights

This Assignment of Intellectual Property Rights (this "Assignment") is made and entered into as of October 13, 2017 by and among: Loud Audio, LLC, a Delaware limited liability company ("Buyer"), (ii) Loud Technologies Inc., a Washington corporation (the "Company") and (iii) those Subsidiaries of the Company listed on Annex A to the Agreement (as defined below) (collectively with the Company, the "Sellers").

WHEREAS, Buyer and Sellers have entered into that certain Asset Purchase Agreement, dated as of September 18, 2017, by and among Buyer and Sellers (the "Agreement"); and

WHEREAS, under the terms of the Agreement, Sellers have agreed to, among other things, assign to Buyer all of Sellers' right, title and interest in and to the Company Intellectual Property (as such term is defined in the Agreement), including without limitation the intellectual property rights set forth on Schedule A.

NOW, THEREFORE, intending to be legally bound and in consideration of the mutual provisions set forth in this Assignment and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Capitalized terms used, but not otherwise defined, herein shall have the meanings ascribed to such terms in the Agreement.
2. Sellers do hereby convey, transfer, assign and deliver absolutely and forever to Buyer all of Sellers' right, title and interest in and to the Company Intellectual Property, including without limitation (i) the intellectual property rights set forth on Schedule A, (ii) any and all registered Company Intellectual Property and previously filed applications for registration, (iii) the right to apply for new registrations for the Company Intellectual Property, (iv) the right to prosecute, maintain, enforce, use and otherwise exploit Company Intellectual Property, (v) all income, royalties, damages, and payments hereafter due or payable to Sellers with respect to the Company Intellectual Property, including without limitation the right to sue for past, present or future infringement, misappropriation or dilution of any of the Company Intellectual Property, (vi) all good will of the Business associated with the Company Intellectual Property, and (vii) all rights in and under the Company Intellectual Property to the fullest extent allowed by law as fully as Sellers would have held the same in the absence of this Assignment.
3. Sellers hereby request the Commissioner of Patents and Trademarks, the U.S. Copyright Office, and any other applicable governmental entity or registrar (including any applicable foreign or international office or registrar), to record Buyer as the owner of the patents, trademarks, copyrights, or other Company Intellectual Property (as applicable) transferred to Buyer hereunder, and to issue any and all patents, trademarks, copyrights or other Company Intellectual Property (as applicable) transferred to Buyer hereunder to Buyer, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Buyer, its successors, assigns or other legal representatives. Sellers hereby covenant and agree that, at any time and from time to time forthwith upon the written request of Buyer, Sellers shall (i) use commercially reasonable efforts to take, or cause to be taken, all actions and to do, or cause to be done, all things necessary, proper or advisable to consummate and make effective the transactions contemplated by this Assignment, (ii) execute any documents, deeds, assignments (including short-form assignment agreements for purposes of recordation), transfers, assurances, instruments or conveyances of any kind which may be reasonably necessary or advisable to convey, transfer, assign and deliver unto and vest in Buyer title to all of Sellers' right in and to the Company Intellectual Property, and (iii) cooperate with each other in connection with the foregoing. If Buyer is unable for any reason to secure Sellers' signature to any document required to file, prosecute, register or memorialize the assignment of any rights under any Company Intellectual Property as provided under this Assignment, Sellers hereby irrevocably designate and appoint Buyer and Buyer's duly authorized officers and agents as Sellers' agents and attorneys-in-fact to act for and on Sellers' behalf and

instead of Sellers to take all lawfully permitted acts to further the filing, prosecution, registration, memorialization of assignment, issuance and enforcement of rights under such Company Intellectual Property, all with the same legal force and effect as if executed by Sellers. The foregoing is deemed a power coupled with an interest and is irrevocable.

4. This Assignment is subject in all respects to the terms and conditions of the Agreement and is intended only to document the assignment of the Company Intellectual Property. Nothing contained in this Assignment shall be deemed to supersede any of the obligations, agreements, representations, covenants or warranties of Sellers and Buyer contained in the Agreement.

5. This Assignment (and any claim or controversy arising out of or relating to this Assignment) shall be governed by the law of the State of Delaware without regard to conflict of law principles that would result in the application of any law other than the law of the State of Delaware.

6. This Assignment may be executed in one or more counterparts, each of which when executed shall be deemed an original and all of which together shall constitute one and the same instrument. The parties agree that this Assignment shall be legally binding upon the electronic transmission, including by facsimile or email, by each party of a signed signature page to this Assignment to the other party.

IN WITNESS WHEREOF, the parties hereto have caused this Assignment to be duly executed on their respective behalf, by their respective officers thereunto duly authorized, all as of the day and year first above written.
