WHEREAS, Assignor and Assignee, among others, are party to that certain Asset Purchase Agreement, dated as of December 20, 2018 (the “Purchase Agreement”); and

WHEREAS, under the terms of the Purchase Agreement, Assignor agreed to deliver and transfer to Assignee all of Assignor’s right, title and interest in, to and under (a) the patents and patent applications set forth on Exhibit A hereto (the “Patents”); (b) the trademarks and service marks, trademark and service mark registrations, and trademark and service mark applications set forth on Exhibit B hereto (including any and all goodwill associated with or symbolized by any of the foregoing) (the “Trademarks”); (c) the Internet domain names set forth on Exhibit C hereto and the Internet domain name registrations therefore (including any and all goodwill associated with or symbolized by any of the foregoing) (the “Domain Names”); and (d) all reissues, divisionals, continuations, continuations in-part, extensions, renewals, reexaminations and foreign counterparts of any the foregoing (collectively, with the Patents, Trademarks and Domain Names, the “Assigned IP”), and to execute this Assignment; and

WHEREAS, under the terms of the Purchase Agreement, Assignee agreed to acquire the Assigned IP from Assignor.

NOW, THEREFORE, for good and valuable consideration, including the consideration reflected in the Purchase Agreement, the sufficiency and receipt of which is hereby acknowledged, Assignor and Assignee hereby agree as follows:

1. Assignor hereby assigns, transfers and conveys to Assignee, and Assignee hereby accepts the assignment, transfer and conveyance of, Assignor’s entire worldwide right, title and interest in, to and under the Assigned IP including, without limitation, (i) all rights and privileges arising under applicable law with respect to Assignor’s use of any of the Assigned IP; (ii) all rights of any kind whatsoever of Assignor accruing under the foregoing provided by applicable law of any jurisdiction, international treaties and conventions, and otherwise throughout the world; and (iii) any and all rights of action pertaining to any of the foregoing, including, without limitation, all rights in and to all causes of action (whether in law or in equity) with respect thereto, the right to sue, counterclaim, and recover for past, present and future infringement of the Assigned IP or any rights relating to the Assigned IP, the right to secure registration of the Assigned IP and of this Assignment, the right to initiate and prosecute other proceedings before all government and administrative bodies with respect to the Assigned IP, and the right to claim priority, file foreign counterparts, and any and all other proceeds of any of the foregoing, including, but not limited to, all income, royalties, fees, damages, payments and other proceeds now or hereafter due or payable with respect thereto.

2. This Assignment is binding upon, and inures to the benefit of, the parties hereto and their respective legal representatives, successors and assigns. It is understood that any finding of invalidity of one assignment as effected hereby shall not affect the assignment of other Assigned IP. All questions concerning the construction, validity and interpretation of this Assignment and the performance of the obligations imposed by this Assignment shall be governed by, and construed in accordance with, the laws of the State of Delaware without regard to any choice of law or conflict of law provision or rule that would cause the application of the laws of any other jurisdiction.
3. Upon reasonable request by Assignee and at Assignee's sole cost and expense, the Assignor will execute additional documents and take other actions as may be necessary or desirable to record or memorialize the assignments of the Assigned IP, and to vest in Assignee such right, title and interest in and to the Assigned IP as assigned and transferred to Assignee hereunder.
4. Assignor hereby authorizes and requests the officials of the United States Patent and Trademark Office, and the corresponding entities or agencies in any applicable foreign jurisdiction, to record Assignee as assignee and owner of the entire right, title and interest in, to and under the Assigned IP.
5. No waiver, modification or change of any of the provisions of this Assignment shall be valid unless in writing and signed by the party against whom such claimed waiver, modification or change is sought to be enforced.
6. This Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Assignment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Assignment.
