## SECOND LIEN INTELLECTUAL PROPERTY SECURITY AGREEMENT

This **SECOND LIEN INTELLECTUAL PROPERTY SECURITY AGREEMENT** (as amended, restated, amended and restated, supplemented or otherwise modified from time to time, the “IP Security Agreement”) dated April 27, 2021, is among the Persons listed on the signature pages hereof (collectively, the “Grantors”) and Morgan Stanley Senior Funding, Inc. (“MSSF”), as collateral agent (the “Collateral Agent”) for the Secured Parties (as defined in the Credit Agreement referred to below).

WHEREAS, Redstone Holdco 1 LP, a Delaware limited partnership (“Holdings”), Redstone Holdco 2 LP, a Delaware limited partnership (the “Parent”), Redstone GP Holdco 2 LLC, a Delaware limited liability company (“Parent GP”), Redstone Buyer, LLC, a Delaware limited liability company (“Redstone Buyer”), Redstone Intermediate (Archer) Holdco LLC, a Delaware limited liability company (“Redstone Archer”), Redstone Intermediate (FRI) Holdco LLC, a Delaware limited liability company (“Redstone FRI”), Redstone Intermediate (NetWitness) Holdco LLC, a Delaware limited liability company (“Redstone NetWitness”), and Redstone Intermediate (SecurID) Holdco LLC, a Delaware limited liability company (“Redstone SecurID” and, collectively with the Parent, Redstone Buyer, Redstone Archer, Redstone FRI and Redstone NetWitness, the “Borrower”) have entered into that certain Second Lien Credit Agreement, dated as of April 27, 2021 (as amended, restated, amended and restated, supplemented or otherwise modified from time to time, the “Credit Agreement”), with the Lenders from time to time party thereto and MSSF, as Administrative Agent and Collateral Agent. Capitalized terms defined in the Credit Agreement or in the Security Agreement (as defined below) and not otherwise defined herein are used herein as defined in the Credit Agreement or the Security Agreement, as the case may be (and in the event of a conflict, the applicable definition shall be the one given to such term in the Security Agreement).

WHEREAS, as a condition precedent to the making of the Loans by the Lenders from time to time, each Grantor has executed and delivered that certain Second Lien Security Agreement, dated as of April 27, 2021 (as amended, restated, amended and restated, supplemented or otherwise modified from time to time, the “Security Agreement”), among the Grantors from time to time party thereto and the Collateral Agent.

WHEREAS, under the terms of the Security Agreement, the Grantors have granted to the Collateral Agent, for the benefit of the Secured Parties, a security interest in, among other property, certain intellectual property of the Grantors, and have agreed thereunder to execute this IP Security Agreement for recording with the USPTO and/or the USCO, as applicable.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Grantor agrees as follows:

A. Grant of Security. Each Grantor, as collateral security for the prompt and complete payment and performance of the Secured Obligations of such Grantor, hereby grants to the Collateral Agent (and its successors and permitted assigns), for the benefit of the Secured Parties, a security interest in and to all of such Grantor’s right, title and interest in and to the following, whether now owned or hereafter acquired by the undersigned (the “Collateral”):

a. all patents and patent applications, including, without limitation, those set forth in Schedule A hereto (the “Patents”);

b. all trademark and service mark registrations and applications, including, without limitation, those set forth in Schedule B hereto (provided that no security interest shall be granted in United States intent-to-use trademark applications prior to the filing and acceptance of a “Statement of Use” pursuant to Section 1(d) of the Lanham Act or an “Amendment to Allege Use” pursuant to Section 1(c) of

the Lanham Act with respect thereto, to the extent that, and solely so long as, the creation of a security interest therein or the assignment thereof would impair the validity or enforceability of any registration that issues from such intent-to-use application under applicable federal law or result in the loss of any material rights therein), together with the goodwill symbolized thereby (the “Trademarks”);

c. all copyrights, whether registered or unregistered, including, without limitation, the copyright registrations and applications set forth in Schedule C hereto (the “Copyrights”);

d. all reissues, divisions, continuations, continuations-in-part, extensions, renewals and reexaminations of any of the foregoing, all rights in the foregoing provided by international treaties or conventions, all rights corresponding thereto throughout the world and all other rights of any kind whatsoever of such Grantor accruing thereunder or pertaining thereto;

e. any and all claims for damages and injunctive relief for past, present and future infringement, dilution, misappropriation, violation, misuse or breach with respect to any of the foregoing, with the right, but not the obligation, to sue for and collect, or otherwise recover, such damages; and

f. any and all proceeds of, collateral for, income, royalties and other payments now or hereafter due and payable with respect to, and supporting obligations relating to, any and all of the Collateral of or arising from any of the foregoing; provided that notwithstanding anything to the contrary contained in the foregoing clauses (a) through (f), the security interest created hereby shall not extend to, and the term “Collateral” shall not include, any Excluded Property.

B. Security for Obligations. The grant of a security interest in the Collateral by each Grantor under this IP Security Agreement secures the payment of all Secured Obligations of such Grantor now or hereafter existing under or in respect of the Loan Documents (as such Loan Documents may be amended, restated, amended and restated, supplemented, replaced, refinanced or otherwise modified from time to time (including any increases of the principal amount outstanding thereunder)). Without limiting the generality of the foregoing, this IP Security Agreement secures, as to each Grantor, the payment of all amounts that constitute part of the Secured Obligations that would be owed by such Grantor to any Secured Party under the Loan Documents but for the fact that they are unenforceable or not allowable due to the existence of a bankruptcy, or reorganization or similar proceeding involving a Loan Party.

C. Recordation. Each Grantor authorizes and requests that the Register of Copyrights, the Commissioner for Patents and the Commissioner for Trademarks record this IP Security Agreement.

D. Execution in Counterparts; Electronic Execution. This IP Security Agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement. The words “execution,” “execute,” “signed,” “signature,” and words of like import in this IP Security Agreement or any amendment or other modification hereof shall be deemed to include electronic signatures or the keeping of records in electronic form, each of which shall be of the same legal effect, validity or enforceability as a manually executed signature or the use of a paper-based recordkeeping system, as the case may be, to the extent and as provided for in any applicable Law, including the Federal Electronic Signatures in Global and National Commerce Act, the New York State Electronic Signatures and Records Act, or any other similar state laws based on the Uniform Electronic Transactions Act.

E. Grants, Rights and Remedies. This IP Security Agreement has been entered into in conjunction with the provisions of the Security Agreement. Each Grantor does hereby acknowledge and confirm that the grant of the security interest hereunder to, and the rights and remedies of, the Collateral Agent with respect to the Collateral are more fully set forth in the Security Agreement, the terms and

provisions of which are incorporated herein by reference as if fully set forth herein. In the event of any conflict between the terms of this IP Security Agreement and the terms of the Security Agreement, the terms of the Security Agreement shall govern.

F. Governing Law; Jurisdiction; Etc. Sections 10.15, 10.16 and 10.17 of the Credit Agreement are hereby incorporated by reference, *mutatis mutandis*.

G. Intercreditor Agreement. Notwithstanding any provision to the contrary in this IP Security Agreement (but without expanding the scope of the Collateral as set forth in this IP Security Agreement and the Credit Agreement), in the event of any conflict or inconsistency between the provisions of the First Lien/Second Lien Intercreditor Agreement (or any other intercreditor agreement entered into by the Collateral Agent in accordance with Section 9.11 of the Credit Agreement) and this IP Security Agreement, the provisions of the First Lien/Second Lien Intercreditor Agreement or such other intercreditor agreement, as applicable, shall prevail.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, each Grantor and the Collateral Agent have caused this IP Security Agreement to be duly executed and delivered by its officer thereunto duly authorized as of the date first written above.

Recovery mechanism for fault-tolerant split-server passcode verification of one-time authentication tokens	9749314	2017-08-29	15/097,773	2016-04-13
Managing use of security keys	9774446	2017-09-26	13/731,455	2012-12-31
Distributed proactive password-based secret sharing	9813244	2017-11-07	14/984,389	2015-12-30
Detection of malicious web activity in enterprise computer networks	9838407	2017-12-05	15/085,551	2016-03-30
Detection and remediation of watering hole attacks directed against an enterprise	9838419	2017-12-05	14/954,043	2015-11-30
Forward secure one-time authentication tokens with embedded time hints	9871785	2018-01-16	13/828,503	2013-03-14
Key provisioning method and apparatus for authentication tokens	9917694	2018-03-13	14/092,028	2013-11-27
Methods and apparatus for generalized password-based secret sharing	9929860	2018-03-27	14/984,352	2015-12-30
Security-aware single-server passcode verification for one-time authentication tokens	9967251	2018-05-08	14/266,201	2014-04-30
Efficient detection of network anomalies	9967275	2018-05-08	14/972,613	2015-12-17
Entropy-based beaconing detection	9985980	2018-05-29	14/969,801	2015-12-15

<b>Title</b>	<b>Patent No./(Publication No.)</b>	<b>Issue Date</b>	<b>App. No.</b>	<b>App. Date</b>
Classifying potentially malicious and benign software modules through similarity analysis	9998484	2018-06-12	15/082,731	2016-03-28
Method, apparatus and computer program product for verifying caller identification in voice communications	10063699	2018-08-28	15/490,145	2017-04-18
Controlling user access to protected resource based on outcome of one-time passcode authentication token and predefined access policy	10091204	2018-10-02	14/266,192	2014-04-30
Identification and removal of duplicate event records from a security information and event management database	10108634	2018-10-23	15/078,375	2016-03-23
Managing use of security keys	10116438	2018-10-30	15/684,087	2017-08-23
Server using proof-of-work technique for hardening against denial of service attacks	10116693	2018-10-30	15/194,679	2016-06-28
Classifying software modules based on comparisons using a neighborhood distance metric	10122742	2018-11-06	15/191,027	2016-06-23
Efficient operation of GRC processing platforms	10140267	2018-11-27	14/980,252	2015-12-28
Authenticating by labeling	10229260	2019-03-12	14/227,506	2014-03-27
Detecting periodic behavior in a communication session using clustering	10230744	2019-03-12	15/192,034	2016-06-24
Authenticating by labeling	10263972	2019-04-16	15/434,795	2017-02-16
Token seed protection for multi-factor authentication systems	10289835	2019-05-14	15/180,284	2016-06-13
Method, apparatus and computer program product for assessing the risk of electronic communications using logon types	10356120	2019-07-16	15/581,055	2017-04-28
Cryptographic device configured to transmit messages over an auxiliary channel embedded in passcodes	10367642	2019-07-30	13/711,877	2012-12-12
Protecting key material using white-box cryptography and split key techniques	10511436	2019-12-17	15/664,250	2017-07-31
Method, apparatus and article of manufacture for categorizing computerized messages into categories	10594546	2020-03-17	15/684,235	2017-08-23
Predefined access policy implementation based on auxiliary information embedded in one-time authentication passcodes	10673832	2020-06-02	16/104,280	2018-08-17
Methods and apparatus for computing estimated quantiles for streaming data over sliding windows	10685018	2020-06-16	15/192,165	2016-06-24
Managing passwords	10776481	2020-09-15	16/176,223	2018-10-31

Title	Patent No./(Publication No.)	Issue Date	App. No.	App. Date
Generating random pass-phrases using word-level recurrent neural networks	10872610	2020-12-22	16/264,303	2019-01-31
Automated determination of device identifiers for risk-based access control in a computer network	10885162	2021-01-05	16/024,594	2018-06-29
User authentication using scene composed of selected objects	10949524	2021-03-16	16/176,083	2018-10-31
Cryptographic device with administrative access interface utilizing event-based one-time passcodes	10951412	2021-03-16	16/249,474	2019-01-16
Biometric Authentication Using Selected Manipulation of Biometric Samples	(20200134146)	2020-04-30	16/176,079	2018-10-31
User Authentication Using Biometric Representation of One-Time Passcodes	(20200137052)	2020-04-30	16/176,070	2018-10-31
MONITORING STRENGTH OF PASSWORDS	(20200143036)	2020-05-07	16/178,636	2018-11-02
MANAGING ENTERPRISE AUTHENTICATION POLICIES USING PASSWORD STRENGTH	(20200143037)	2020-05-07	16/178,646	2018-11-02
AUTHENTICATION USING USER DEVICE MICROPHONE INPUTS	(20200242220)	2020-07-30	16/259,391	2019-01-28
Biometric Authentication Using Molecular Snapshots	(20200242225)	2020-07-30	16/261,946	2019-01-30
USER ACCOUNT RECOVERY TECHNIQUES USING SECRET SHARING SCHEME WITH TRUSTED REFEREE	(20200242232)	2020-07-30	16/262,191	2019-01-30
Communication-Efficient Device Delegation	(20200244465)	2020-07-30	16/261,916	2019-01-30
Location Assurance Using Location Indicators Modified by Shared Secrets	(20200244670)	2020-07-30	16/261,941	2019-01-30
ANONYMIZING DATA SETS IN RISK MANAGEMENT APPLICATIONS	(20200250315)	2020-08-06	16/265,636	2019-02-01
Account Recovery Using Identity Assurance Scoring System	(20200252381)	2020-08-06	16/263,276	2019-01-31
Authentication Based on Shared Secret Updates	(20200252385)	2020-08-06	16/264,897	2019-02-01
Authentication Based on Shared Secret Seed Updates for One-Time Passcode Generation	(20200252392)	2020-08-06	16/264,925	2019-02-01
Managing Passwords	(20200356660)	2020-11-12	16/942,958	2020-07-30
