

Reach new levels. Diabetes remission is possible.

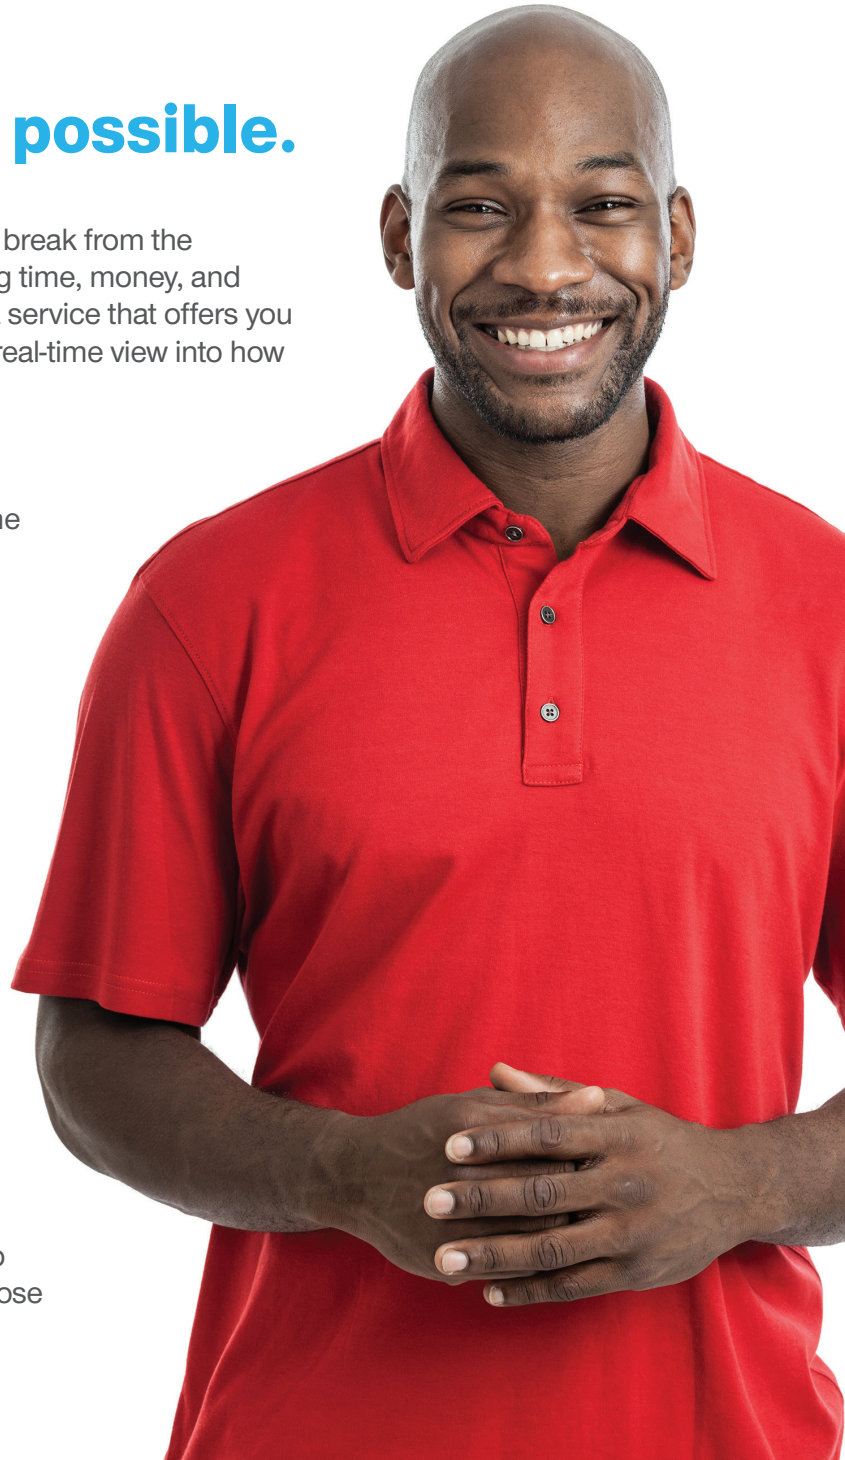

When successful, type 2 diabetes remission means a break from the burden of medication and disease progression—giving time, money, and peace of mind back to you. Level2™ diabetes care is a service that offers you counseling to make meaningful changes based on a real-time view into how your activity, food, and sleep impact your diabetes.

What does Level2™ diabetes care look like?

We call it whole person health. Mind. Body. Spirit. The coaches and clinical team of Level2™ diabetes care put you at the center by making meaningful insights based on what's going on in *your life*. They can help you make sense of everyday diabetes decisions. To do this, we harness the power of cutting edge technologies and biometric tracking to personalize your experience.

- **An FDA-approved Dexcom G6 continuous glucose monitor tracks blood sugars 24/7—no more fingersticks every time you check**
- **A Fitbit Versa Lite counts your steps, heart rate and sleep**

Whatever your diabetes goals are—losing weight, reducing medications, or just feeling better, Level2™ diabetes care can provide the services and support to help you take simple but meaningful steps towards those goals and could even help you put your diabetes into remission.
