

My Monitoring

The best defense is early detection.

We help prevent identity theft from becoming a problem by monitoring activity and sending you alerts for validation. If fraud has occurred, we work closely with you to restore your identity to the way it was – backed by our 100% Recovery Guarantee and \$1 million insurance to cover any eligible losses.

Monitoring Activity Notification
Dear Ryan, you have a new alert on your account.

Credit Monitoring

The best protection starts with pro-active detection. Identity thieves don't rest, and neither do we. Time is of the essence, so MyIDCare's vigilant credit monitoring system constantly scans your credit activity for anything suspicious. As soon as a threat is identified, we'll send you an alert so that you can validate if fraud has occurred, and take action immediately.

[About Our Plans](#)

“My children are young and don't have any accounts in their names. Why would we need identity protection for them?”

– Member from Los Angeles, CA

Even if your child doesn't have assets, their identity is still at risk. Their Social Security number can be used to open a bank account, apply for government benefits, or rent an apartment. Many schools and healthcare institutions require Social Security numbers, which puts your child at risk for theft.

CyberScan™

CyberScan is a surveillance engine that proactively searches the internet and the dark web - from websites, to blogs, bulletin boards, Internal Relay Chat ("IRC") channels and beyond. CyberScan seeks out compromised personal information and triggers an alert if your data is detected.

Data breaches exposed over 145 million people to identity theft in 2017.

"This is what organized crime looks like. These are the most profitable, most capable criminals in the world and we've got to do a better job of keeping them out."

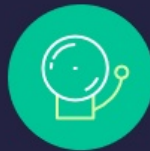

— former FBI Assistant Director Chris Swecker *

Credit monitoring and alerts shine a spotlight on questionable activity.

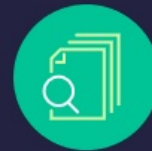

Your credit is scanned multiple times daily

Identity thieves can do a lot of damage very quickly once they

Changes to your credit file trigger an alert

By changing the address for an account, thieves attempt to

New account fraud is detected quickly

You may open a new account for a car loan or credit card, but so

get a hold of your personal data. Constant monitoring of your credit file means we catch fraud as soon as possible.

cover their tracks before they launch larger fraud efforts. This type of activity triggers an alert so action can be taken.

can an identity thief. Alerts notify you of new accounts so you can validate and halt any fraud right away.

“

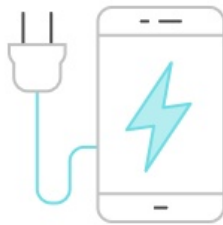

I switched to MyIDCare because competitors failed to warn me about credit card accounts that were opened.
