Why EcoStar

At EcoStar, we have set ourselves up to be a recycling star by using the highest quality PET (EcoStar®) to produce our packaging solutions. We're committed to our customers, creating the best out of plastic – to make better and help the planet. We're also committed to our people, our products and our planet.

Driven by consumer demand for sustainable, high quality and high quality PET, we make solutions from recycled to packaging products that are made from 100% recycled PET bottles for use in packaging for beverage, food and consumer products. We're committed to the planet, to our people and to our planet.

We're a company committed to sustainability. In fact we're founded with the belief that the recycling of existing PET containers is the responsible solution for the preservation of resources and reduction of landfill waste.

LEADERS IN EXTRUDER PET ROLLSTOCK

Our extruder products are all recycled and made from 100% recycled PET. We're committed to our customers, creating the best out of plastic – to make better and help the planet. We're also committed to our people, our products and our planet.

CUSTOMER SERVICE YOU CAN COUNT ON

Our extruder products are all recycled and made from 100% recycled PET. We're committed to our customers, creating the best out of plastic – to make better and help the planet. We're also committed to our people, our products and our planet.

Research firm Freedonia Group states that by 2018 US demand for post-consumer recycled plastics will reach roughly 3.5 billion lbs.

ABOUT

Why EcoStar

At EcoStar, we're not only committed to recycling and extruding the highest quality rigid PET rollstock for thermoform packaging applications, we're committed to our vision of getting the most out of plastic – to reuse, recycle and replastic this highly valuable material, reducing our environmental impact.

Driven by consumer demand, our sustainable, high quality and high clarity thin-gauge PET rollstock materials have been trusted to package, protect and showcase products from fresh-cut, pre-packed foods for regional brand owners to toys, cosmetics and healthcare products for some of the world's leading consumer goods' companies.

We're a company committed to sustainability. In fact we we're founded with the belief that the recycling of existing PET containers is the responsible solution for the preservation of resources and reduction of landfill waste.

LEADERS IN EXTRUDED PET ROLLSTOCK

Our EcoStar products are ultra-clear, resilient and easy to thermoform, from our FDA food-grade RPET rollstock to our consumer retail PC50 line with a minimum of 50% post-consumer content. At EcoStar, we have a wide depth of experience in processing PET bottles and thermoforms into high-performance sheet that delivers on your quality requirements, sustainability objectives and tight timelines.

CUSTOMER SERVICE YOU CAN COUNT ON

Honesty, integrity and customer service are as important as the quality of rollstock we produce. We have developed long-term relationships with our customers by providing consistently high quality PET rollstock and customer service that goes that extra mile.

Research firm Freedonia Group states that by 2016 US demand for post-consumer recycled plastics will reach roughly 3.5 billion lbs.
