Placon's HomeFresh Entrée containers bring premium design, a new modern look, and unsurpassed functionality to hot meal offerings. Available in 9 sleek, effortless stacking sizes from 8 to 40 ounces, the microwavable containers include unique stacking features and allows the products to double stack and inter stack together. Perfectly sized to fit into standard small and large carryout bags, the containers won't slide and spill due to their deep snap grooves permitting the lids to close securely with an audible snap, but easily open with large tabs. The sealable containers include a variety of lid options, including an EcoStar® PET option.

Please check samples you wish to receive, then click the Request a Sample button to place your order.
