Fitness Belt for Phone & Keys

The classic FlipBelt is a comfortable running belt alternative to running armbands that don't fit all your things and bulky running pouches that bounce as you move. The FlipBelt waist band for running is specifically designed to sit flat and securely on your hips without bouncing or riding up. With no buckles to pinch or cause uncomfortable chafing, simply pull FlipBelt Classic on like a pair of pants, place over or under clothes, and easily slide in your stuff through the multiple openings around the belt.

The sleek, tubular design of the FlipBelt Classic allows you to easily, comfortably and securely carry everything you need while running, hiking, biking, working out at the gym, traveling and more. This exercise belt features moisture wicking fabric that easily stretches to fit large phones like the iPhone XR and Samsung Notes ([Phone Compatibility List](#)) while also giving you plenty of room to store keys, cards, IDs and small medical devices. Turning the belt over closes all openings and further secures your items in place.
