

"THE MORE LIGHT, THE BETTER..."

...The KIS™ lamp is all they said it would be – and more!"

Dan M.

KEEP IT SIMPLE!

MyLight has combined classic lamp design with a revolutionary light source. The combination delivers exponentially more light for reading or any other task. The KIS lamp design and lighting technology will outperform any and all light sources now used in your home.

Underlighting is overrated

We've been gradually underlighting since the Energy Crisis of the mid 1970's. Saving energy is the right thing to do but as we've gotten older, we think it's just our eyesight that is going. More often than not, **OUR LIGHT HAS FAILED US!**

YOU NEED:

- Up to 300 footcandles for reading but you're getting only 30 to 50 footcandles.*
- LIGHT in specific WAVELENGTHS for clarity and contrast to compensate for age related changes in vision.
- Light with LESS GLARE from overhead fixtures and greater diffusion from light bulbs and lampshades.

What happened to the light?

The odds are good that you've used LED or CFL bulbs that save energy and last longer. However, these bulbs are weaker for task light than their incandescent equivalents. If you're middle aged, a 60 watt light bulb delivers only a FRACTION of the light you need – and the 60 watt "equivalent" CFL and LED's yield even less task light!

* Footcandles describe the amount of light falling on your reading material.

The first light source designed for lamps

This revolutionary light source will deliver up to 10 times more light than the single bulb you are now using – for only 32 watts!

Its patented LED bulb array may appear to be "upside down" – but the 4 bulb spread of light is actually down and out, perfect for task light.

The single bulb you now use is pointed up and out in the opposite direction of the task!

The moreLamplight light source focuses light exactly where it's needed.

▲ Swing arm extends 6".

The KIS™ Lamp

◀ Available in classic satin brass or brushed silver finish

◀ Lamp's height adjusts from 43" to 58".

Soft linen lampshade diffuses ambient light for less glare.
