

# "It's like I'd been reading under moonlight!"

"Reading in dim light was causing me headaches and eyestrain. Those fluorescent and LED bulbs made matters WORSE. The moreLamplight solved those problems and now I can enjoy my favorite hobby far longer without blurring or glare."

- Patricia M.

Introducing a revolutionary light for lamps!

more  
**Lamplight™**

Compact LED bulbs to focus light on task with reduced glare.

Proprietary (4) socket array directs light down and out where you need it.

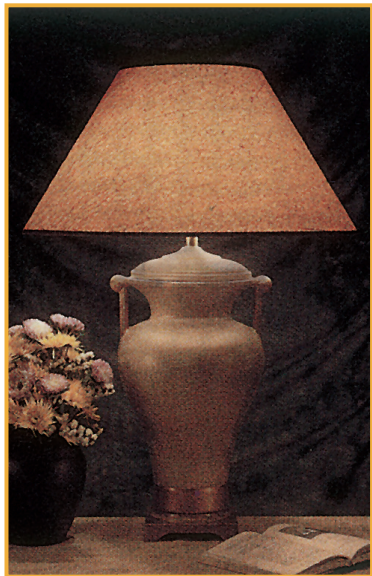

Standard bulb base fits right into your lamp's socket.

Bulb surface is cool to the touch. Heat is transferred up and absorbed by the module.

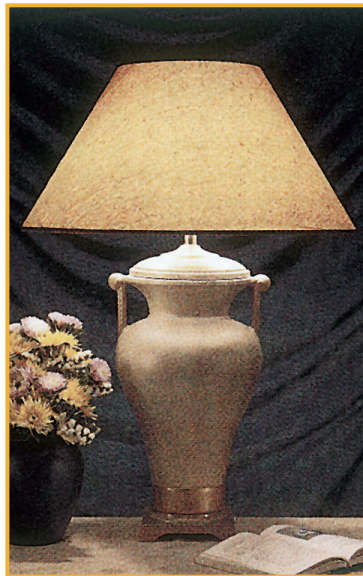

US Patent Number 10378698

MoreLamplight's proprietary LED READER bulb array may appear to be "upside down" – but the spread of light is actually down and out, perfect for task light.

\*\*

60 watt equivalent LED bulb. It delivers only a fraction of the light you need.

32 watt moreLamplight system. Delivers up to 10 times more task light.

\* Reader bulbs are smaller than regular bulbs to enhance the diffusion of your lampshade and reduce glare. MoreLamplight uses any harp 8.5" (included with order) or taller.

\*\* Photos are illustrative of lighting intensity. Results vary.

MoreLamplight screws right into your existing lamp socket – just like changing a light bulb. This is a patented retrofit lighting system\* that delivers up to 10 times more light than the single bulb you are now using – for only 32 watts!

**100% risk free trial and 3 year guarantee**

**Includes:**

- The LED moreLamplight™ module
- (4) compact LED READER bulbs
- (1) lamp harp
