## Online Storage

Stay ahead of the curve with Fortress Mobile WiFi and Cellular auto download technology, the smart network coverage for the ultimate solution in fleet vehicle management. Fortress Mobile provides automatic file retrieval systems using Wireless and Cellular technology. You can also able to use your own network drive and/or our cloud storage for convenient sharing of secure video links with password protections.

Remote Configuration

For further customization or support, Surebus provides admin users the ability to change their vehicle DVR's configuration while sitting at their remote computer. Communicating via cellular signal, the DVR can talk to the SureBus cloud instantly, and any changes will be deployed right away.

CAN Bus Visibility

Modern vehicles use a CAN Bus to transfer information between the various electronic vehicle systems. This communication network can provide a wide range of data that can be used to reduce running costs, improve driver safety, streamline maintenance processes and support environmental responsibility. Fortress Mobile's SureBus system is a warranty-friendly solution that connects into the CAN Bus system to remotely access added understanding into the performance and use of a vehicle
