

# DIFFERENT BY DESIGN

## PHILOSOPHICALLY

Science driven,  
patient focused,  
nonprofit organization

## SCIENTIFICALLY

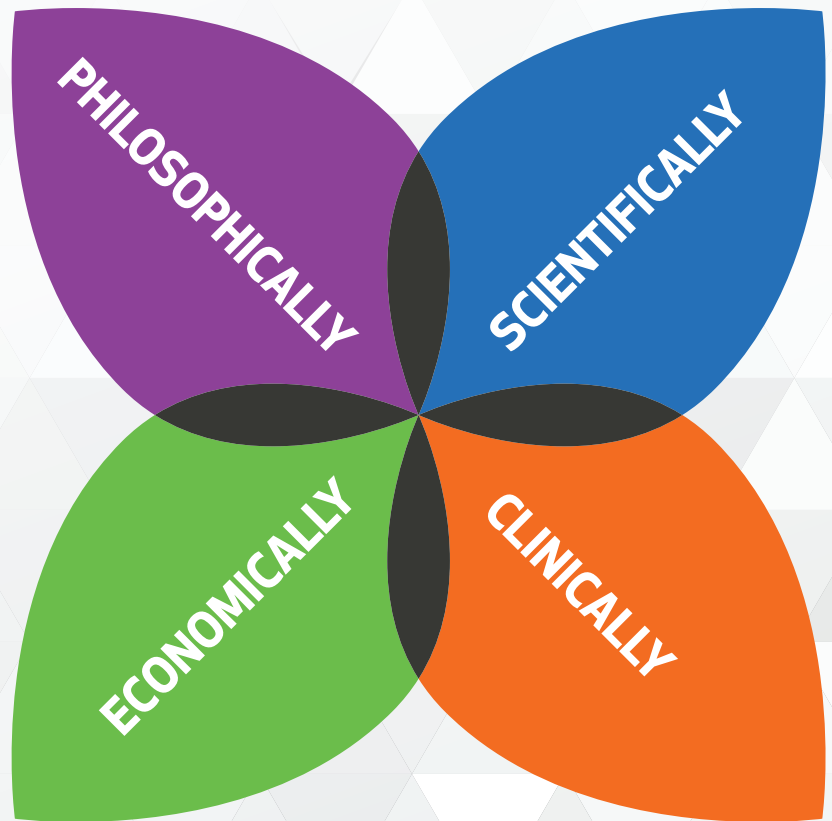

Expertise in processing  
combined with extensive  
research

## CLINICALLY

Supported by robust  
Level 1 clinical evidence\*

## ECONOMICALLY

Committed to value-based  
outcomes

# ADVANCING THE SCIENCE OF WOUND CARE

For over 30 years, we've set ourselves apart with a dedication to advancing the science of transplantation. As a 501 (c) (3) nonprofit that was physician-founded in 1987, we've provided over 8.6 million allografts to facilities and physicians for transplantation for more than 132,000 donors.

We honor donated gifts by developing innovative, effective allograft solutions to help people heal. The work we do is both life-changing and life-saving. Through both our Medical and Donation Board of Trustees, we continue to be directed by physicians and donor families who have a very personal stake in wound care outcomes and innovation.

## SCIENCE DRIVEN & PATIENT FOCUSED

The revenue generated through our ground-breaking tissue solutions is funneled back into research, grants, and product development. To date, we have invested more than \$55 million in research through grants alone. Our drive to advance patient care has led to us to partner with academics whose studies stimulate new ideas in the allograft tissue transplantation field.

## BETTER TISSUE LEADS TO BETTER OUTCOMES

We're committed to preserving the integrity of tissue by setting stricter standards to ensure safety and quality. One of the ways we ensure the highest quality outcomes in donated tissue is through aseptic processing, which preserves and protects the biological value of the donated gift.
