

# About Us

## We Are Tech Industry Vets Who Have Been In The Trenches Since The Early Days Of The Dot-Com Boom

*We've started companies, grown companies and sold companies*

*We've known success and we've known failure - and we've learned a lot along the way.*

*Today, we are CEOs, CFOs,CTOs, CIOs and CMOs who have joined together to inject new life into early stage startups - and the tech industry at large.*

## Why We Do It

As tech industry veterans, we have seen thousands of disruptive ideas that have forever changed the way we work and live. We've also seen too many great ideas that failed to get off the ground. That's why we grabbed a seat in the front row - so we can lend our knowledge and expertise to innovators and innovations, ensuring that no great idea is lost to the dustbin of history because of avoidable roadblocks. We believe in game-changing

technology and the disruptors who drive it. We believe they can change the world for the better - and we're invested in helping them do it.

## Would You Like To Work With Us?
