Front is an inbox for teams that allows for great external communication based on seamless internal collaboration. If you have multi-player accounts like support@, sales@, etc., you're likely worried about dropping the ball or duplicating work. Front brings all of your communication channels (email, SMS, Facebook, Twitter, etc.) into one place so you can triage and assign messages, have internal conversations around them, craft the perfect response and reply via the right channel.

The best

If you are looking for shared email capabilities, this app is great, if you are looking for way more than that, this app is even better. I have been using it for at least 4 years, and [wo more](#)

Love this

Makes us so much more efficient as a team, love the app. We did a lot of research on how to best handle emails and communication as a team and this is awesome. Fully function [more](#)
