Home

We go beyond smart home devices and create a seamless, out-of-the-box patent pending technology solution for both buyers and builders of new and existing residential construction projects.

What is Tech Backbone (TBB)?

TBB™ focuses on the technology infrastructure of the home, something most buyers and builders pay little attention to as most only focus on smart home devices

TBB™ will make sure the home's technology skeleton is flexible and easily upgradable for future advances in tech... so your SMART devices experience as little downtime or interruptions in functionality as possible

To put it simply, we will be your home technology concierge

Pick Your Skeleton

The TBB Process:

1. Review the three standard technology infrastructure skeletons or consult with us for a customizable solution.

2. Select your peripheral options. Everything from doorbells to complete touch panel integration can be part of the design

Service Level

The TBB Process:

1. Review the three standard technology infrastructure skeletons or consult with us for a customizable solution.

2. Select your peripheral options. Everything from doorbells to complete touch panel integration can be part of the design
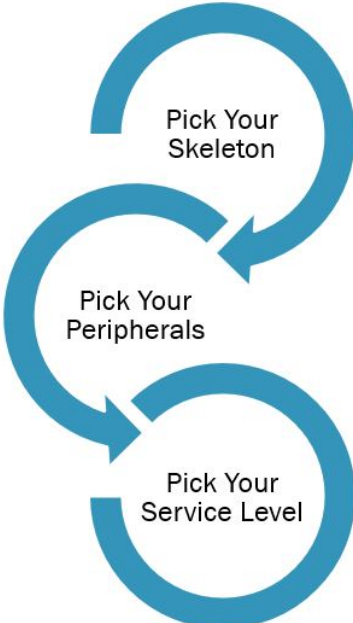

3. Choose how involved you want TBB™ to be from the design to the installation to ongoing support
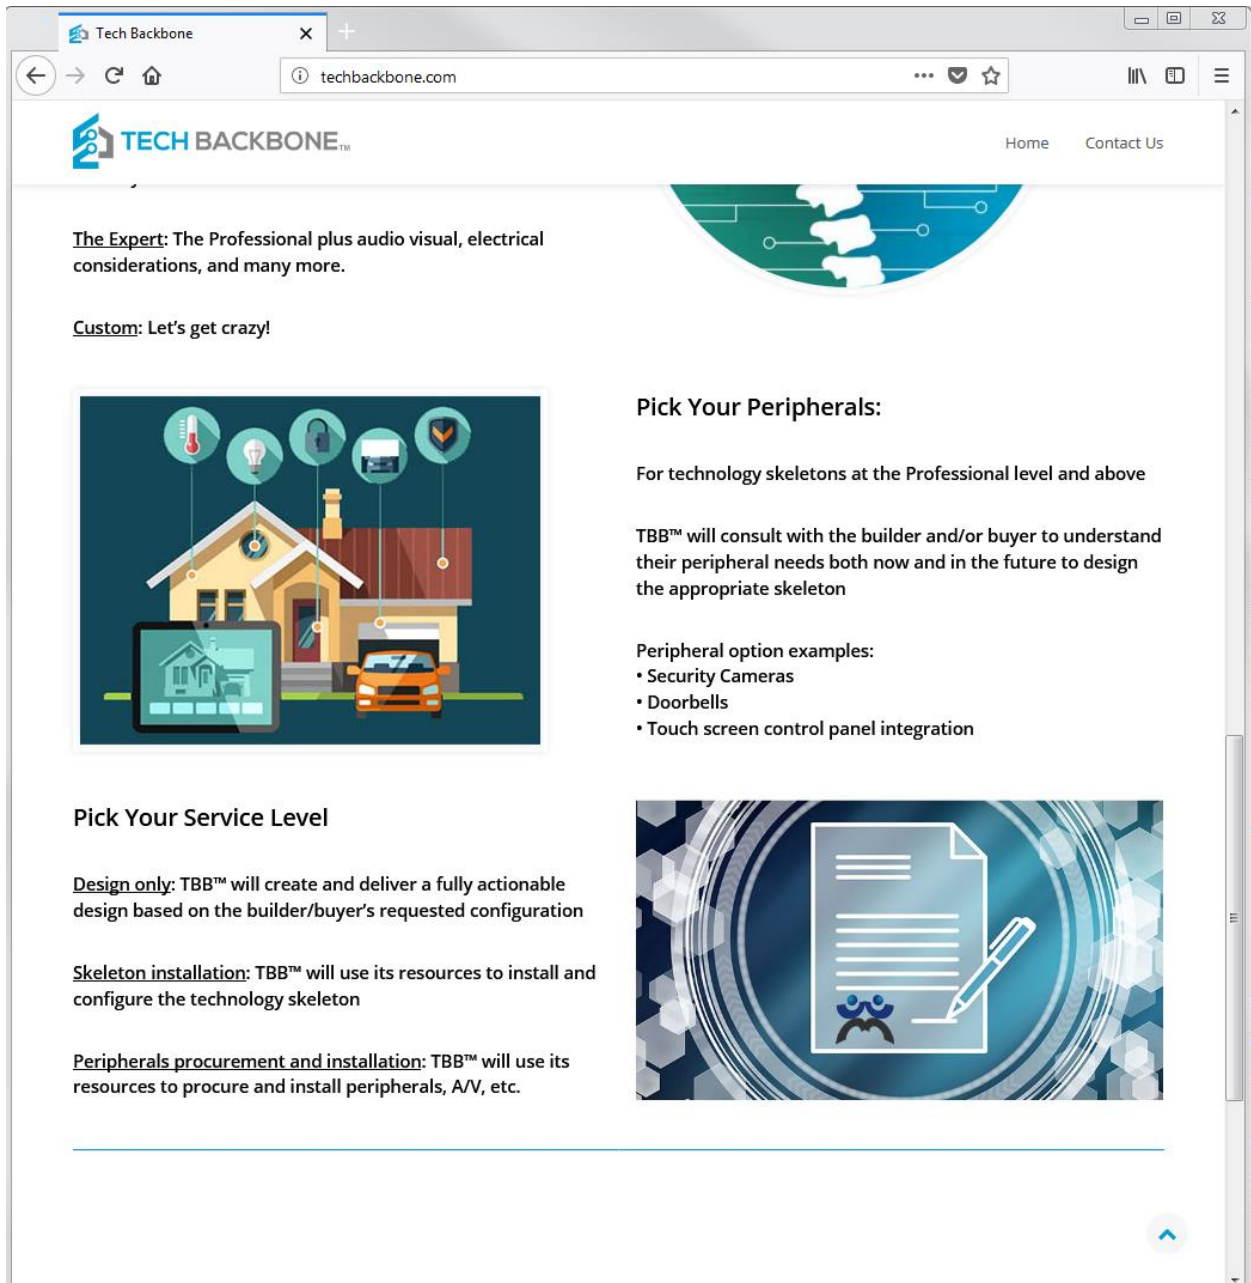

Pick Your TBB™ Skeleton (patent pending):

The Minimalist: A technology skeleton designed for the interior of the structure that is data focused only. Will usually include data ports in bedrooms, offices, family/entertainment areas, etc.

The Professional: The Minimalist plus the possibility of exterior runs, both on structure and extended to curtilage. Will introduce peripheral (doorbells, thermostats, etc.) and security considerations.

The Expert: The Professional plus audio visual, electrical

The Expert: The Professional plus audio visual, electrical considerations, and many more.

Custom: Let's get crazy!

Pick Your Peripherals:

For technology skeletons at the Professional level and above

TBB™ will consult with the builder and/or buyer to understand their peripheral needs both now and in the future to design the appropriate skeleton

Peripheral option examples:
• Security Cameras
• Doorbells
• Touch screen control panel integration

Pick Your Service Level

Design only: TBB™ will create and deliver a fully actionable design based on the builder/buyer's requested configuration

Skeleton installation: TBB™ will use its resources to install and configure the technology skeleton

Peripherals procurement and installation: TBB™ will use its resources to procure and install peripherals, A/V, etc.
