

WHO WE ARE

OUR BACKGROUND

Proper Group is a premium manufacturer of complex tooling and high-performance polymer products in the automotive, lighting, and industrial markets.

We entered the market in 1971 to manufacture injection molds for the major suppliers in the automotive market. We've since grown, expanding our capabilities and developing even better processes. This improvement has a lot to do with our team members. Our people understand our goals and expectations and they work to meet them every day.

Our continued customer success comes from a set of core values:

- Everyone on our team owns their actions and is trusted to be a reliable team member
 - Demonstrate skills, leadership, integrity, and passion in everything we do
- Always be learning and pursuing excellence, becoming better than we were yesterday
 - Welcome change with an optimistic attitude and be open to new ideas
 - Communication is key with everyone we encounter
 - Work with a purpose while delivering quality results
 - Be mindful and respectful in everything we do
