Description

The EVO Rechargeable LED Dive Light sheds light in your darkest moments underwater. Its LED light has three settings to fit your needs. At 100%, the flashlight lasts an hour. At 50%, you can use the light for two hours. If you use the strobe, your EVO light will last you as long as three and a half hours. This narrow spotlight has a 12° beam angle. The visual battery blinks to show you how much time you have left. Green signals a full battery, yellow signals half-full, and red signals a low battery. To recharge it, all you have to do is plug in the USB and connect the light to an outlet for about 4 to 5 hours. Take the EVO light as deep as 328 feet (100m) with you and explore more.

- 1000 lumens to bright up dark spaces, and help with photos and videos
- LED light is durable and has a life expectancy of over 100,000 hours
- Multi-function with 100%, 50% and strobe
- Depth rating of 328ft / 100m
- Rechargeable battery with USB
- One button control for easy operation under water

What's in the Box:

- EVO 1000L LED light
- 18650 battery
- Charging cable
- Carrying case
- Replacement black o-ring for a tight seal
- Lanyard for easy attachment to your wrist
