Pebbles UI: State Machine Controller by BatchTest Corporation

Quickly Create Well-structured Applications

[+] Enlarge Picture

- Simple and very easy to use (drop it on a VI & configure, it is ready to run)
- Pre-defined states (Init, Main, Shutdown, etc) automate tasks for easier & faster designing
- Automatically manages user-specified timing of periodic tasks such as screen refresh
- Reduces clutter, keeps your design clean, organized, and easy to modify or upgrade
- Enum-based design for high performance, avoids user errors of a string-based state machine
- Create well-structured modern looking applications in minutes by adding PebblesUI controls

Overview Resources

Pebbles UI brings new Controls & Indicators for LabVIEW Front-Panel which are made using Adobe Technology and Vector Graphics. Pebbles UI also provides a very easy to use Drag/Drop/Configure interface for LabVIEW Graphical User Interface development including custom animations.

BatchTest Corporation also offers services to upgrade your existing LabVIEW Graphical User Interface to get next generation of looks and feel. Our graphics are especially helpful when a fluid Graphical User Interface is needed, for example in Medical Devices applications which target mostly non-technical audiences.
