

Cooling. Evolved.

Introducing the breakthrough
Ventiva Ionic Cooling Solution: ICE™

CONTACT US

Free your design with a new type of cool.

Silent

Ventiva ICE™ enables noiseless consumer electronics devices without cooling limitations of passive thermal systems

Small & Flexible

Ventiva ICE requires no air gap and is much smaller than clunky heat sinks

No Moving Parts

Ventiva ICE offers a vibrationless operation and a high-level of dependability

We are bringing about a revolution in thermal management

Ventiva's Ionic Cooling Engine (ICE™) is a hybrid cooling solution with none of the drawbacks of noisy and failure-prone axial fans, or large and weighty heat sinks.

Ventiva's ICE provides electronic designers with distinctive ways to reimagine products such as laptops, smartphones, gaming devices, smart cameras, and more.

ABOUT THE TECHNOLOGY
