Early Access Game

Get instant access and start playing; get involved with this game as it develops.

Note: This Early Access game is not complete and may or may not change further. If you are not excited to play this game in its current state, then you should wait to see if the game progresses further in development. [Learn more](#)

WHAT THE DEVELOPERS HAVE TO SAY:

Why Early Access?

"Dark and Light has been in development for a few years, and has gone through many iterations to become the unique Fantasy RPG / Sandbox hybrid that it is today. We still have a grand vision for Dark and Light, and we want to be able to finally realize it. We are proud of the progress we have made thus far, yet in order to fully achieve it" [READ MORE](#)

ABOUT THIS GAME

The shattered remains of the mother planet Gaia float in stark contrast against the sky on nearby satellite planet, Archos, serving as inescapable evidence of the dark forces surrounding the world. As a lone explorer in the wilderness, you must learn to understand the terrain, natural resources, as well as how to domesticate the local creatures and build a home. You will need to harness and control the magical energy that courses through the planet, or you risk being consumed by the looming darkness that permeates throughout the planet.

Every aspect of Dark and Light has been re-imagined, re-worked, and upgraded from the 2004 original. Gaia's very existence is dictated by primal elemental forces, including wind, earth, water, fire, light, and darkness. These elements course through the world, sometimes clashing and causing earth-shattering changes. Gaia houses a number of various biomes, including lush forests, soaring peaks of ice-capped mountains, a towering volcano clouded with sulfur and ash, as well as breezy floating islands, ominous dark forests, wide swamps, and deep caverns. Extreme weather conditions will put you to the test; you'll need to procure food and water, as well as the proper tools required to roam this expansive land and brave the unforgiving elements.

Ages ago, Gaia was attacked by dark forces and collapsed, plunging the world into darkness. Many sought exodus to Archos, one of Gaia's satellite planets - unwittingly (or for some, perhaps intentionally) bringing the dark forces along with them. As a result, Archos's atmosphere has been adversely affected, causing some strange occurrences on the planet during the night. During the day, Archos's landscape is peaceful, but once the sun sets, the planet immediately plunges into chaos. Occasionally, the remnants of Gaia will block out the sun, causing an eclipse on Archos, resulting in a violent, bloodthirsty frenzy among the planet's native creatures. Eclipses also provide an opportunity to obtain incredibly rare magical resources, so players must learn to survive during eclipses if they want to thrive.
