Confidence Technology group is a tech startup that is founded by four friends from various walks of life in the Seattle Area. We are confident that our innovative solutions and products will increase value to the marketplace and stimulate the growth of disruptive Ideas that foster positive change and conversations.

It is our Mission and Goal to become a leader in the Idea space with trusted, cutting-edge designs and products that create mutual value for our company and investors; as we execute with precision and deliver the highest expectations of quality.

With a high level focus on the Design and Development of computer software for mobile applications and wearable technologies, we strive to be a leading Tech Consulting Hub for innovation. We rely on the proper use of research and development, data analysis and under development artificial intelligence to optimize our solutions and products.
