## Recommended Use

Reformation is recommended for interior floors, walls, countertops, and exterior walls in both residential and commercial applications. Reformation is not recommended for exterior horizontal surfaces or exterior paving. **If offset pattern is required for tiles 15 inches or longer, Crossville® recommends an offset of not greater than 33%.** See CrossvilleInc.com for detailed installation instructions.

## Wet Area Use for Reformation Mosaics

Crossville® produces the Reformation 2 x 2 and Block mosaics with the Cross-Sheen® (UPS) finish. The AcuTest<sup>sm</sup> wet Dynamic COF of Reformation is ≥ 0.42. Their small sizes ensure frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Reformation to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.
