

2020 Line Presentation

WHAT IS THIS FAN CALLED

Key Specifications

- **Air Magnifier Technology:** Propel fans use patented Air Magnifier technology to create a powerful stream of uninterrupted airflow without fast spinning blades making it safe for children, pets and during cleaning
- **Remote Control:** With 10 precise airflow settings, sleep timer, on/off and oscillation control;
- **Quieter:** Streamlined air channels for reduced airflow turbulence make the SAP-301 extremely quiet
- **Oscillation Control:** Airflow can be directed around a room one touch for smooth oscillation
- **Easy Tilt:** Pivots on its own center of gravity to direct cool air where you need it
- **Blade less:** Propel fans don't have any fast spinning blades so they are safe
- **Sleep Timer:** Fan can be programmed to turn off after preset intervals ranging from 15 minutes to 9 hours
- **Easy to Clean:** No awkward safety grilles for blades that would make it difficult to clean

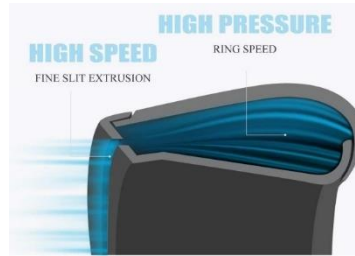

WHAT IS THIS FAN CALLED

Key Specifications

- **Year-round use:** quickly heats the whole room in winter with a powerful fan to cool you in summer
- **Air Magnifier Technology:** Propel fans use patented Air Magnifier technology to create a powerful stream of uninterrupted airflow without fast spinning blades making it safe for children, pets and during cleaning
- **Remote Control:** With 10 precise airflow settings, sleep timer, on/off and oscillation control;
- **Quieter:** Streamlined air channels for reduced airflow turbulence make the SAP-303 extremely quiet
- **Oscillation Control:** Airflow can be directed around a room one touch for smooth oscillation
- **Easy Tilt:** Pivots on its own center of gravity to direct cool air where you need it
- **Blade less:** Propel fans don't have any fast spinning blades so they are safe
- **Sleep Timer:** Fan can be programmed to turn off after preset intervals ranging from 15 minutes to 9 hours
- **Easy to Clean:** No awkward safety grilles or blades that would make it difficult to clean

WHAT IS THIS FAN CALLED

Key Specifications

- **Built in Wi-fi – iOS and Andoid Compatible**
- TouchTech – all controls are via Touch and no hardware buttons on the entrie unit
- Air Magnifier Technology: Propel fans use patented Air Magnifier technology to create a powerful stream of uninterrupted airflow without fast spinning blades making it safe for children, pets and during cleaning
- Remote Control: With 10 precise airflow settings, sleep timer, on/off and oscillation control;
- Quieter: Streamlined air channels for reduced airflow turbulence make the SAP-302 extremely quiet
- Oscillation Control: Airflow can be directed around a room one touch for smooth oscillation
- Easy Tilt: Pivots on its own center of gravity to direct cool air where you need it
- Blade less: Propel fans don't have any fast spinning blades so they are safe
- Sleep Timer: Fan can be programmed to turn off after preset intervals ranging from 15 minutes to 9 hours
- Easy to Clean: No awkward safety grilles or blades that would make it difficult to clean

WHAT IS THIS FAN CALLED

Key Specifications

- **Filters out 99.97 pct. of dust, pollen, mold spores, and pet dander. This air purifier filters particles as small as 0.3 microns and larger air pollution of PM 2.5, helping to improve overall health. Perfect for pet owners, babies, children, the elderly, or anyone wanting to improve the air quality in their home or hotel room. The perfect holiday, birthday, house-warming gifting choice for parents, adult children, colleagues, and friends.**
