

Consulting Services For Producers And Manufactures

We offer consulting services from start to finish to introduce and sell products in the United States, the client defines the product and we do the work. We understand integral logistics and industry processes, which enables us to offer specialized consulting services to manufacturers and producers. The level of service is carefully tailored to each client to define and / or manage permits, obtain certificates, produce packaging, collaborate with customs agents, manage import taxes and everything that is necessary to commercialize products in the US market.

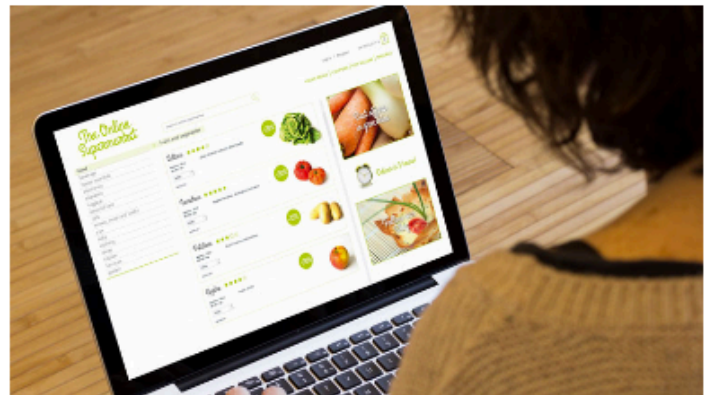

Marketing Services

Using our extensive industry knowledge, we create strategies aligned with the latest trends and tools to connect with the intended target audience. We offer COMPLETE marketing advisory services designed to develop brand recognition, generate demand and create sales opportunities. From traditional to digital strategies, we support our clients in the creation of brands, preparation of sales material such as: POS, catalogs, management of social networks, participation in industry shows, promotional material and much more.

Ecommerce

We have the capability to position your products for sale on online platforms and virtual stores, if this is the appropriate sales channel strategy for your products.

Logistics

We provide advice and support on logistic services: with storage for frozen, refrigerated or dry products and dispatch solutions. Additionally, we offer accounting and / or management services if needed by your company.
