DETAILS

- Ceramic heaters generate instant heat and instant recovery
- Adjustable temperature dial for customized heat up to 420°F.
- 9-ft. Professional 360° swivel cord

The Plugged In HeatMaster Ceramic Flat Iron straightens, flips, smooths and curls. The lightweight, ergonomic design makes it a great multipurpose tool. Ceramic generates far infrared heat and negative ions to straighten from the inside out, improving condition and shine of hair.

Negative ions create smoother, shinier and calmer hair. Ceramic plates provide even heat and prevent damaging hot spots. Smooth, sleek styles are easier than ever to achieve.
