ARWEAVE

Introducing the open web hackathon
Build the new web and get $200 ETH for writing an open source permaweb app! 🚀

Don't let your sources and references fail you

Let the permaweb safeguard your valuable web links

Start archiving now

Read the guide

ARWEAVE

The web is failing you

From journalists, to academics, to legal professionals, we all depend on reliable citations for our work. The traditional web is full of broken links and pages with ever-changing content. The Arweave's blockchain-based permaweb solves these problems once and for all: providing secure, reliable archiving of your sources with bullet-proof cryptography and hundreds of distributed backups.

Legal

Journalism

Set the new standard in journalism by arming yourself with the tools of truth. Never let another source disappear.

Find out more

Research

Your research is timeless, but 98.4% of links don't work after 20 years. Make your research truly verifiable by archiving your web citations on a blockchain.
