## **INFORMATION SHEET CONCERNING THE CLAIMING OF SENIORITIES IN THE CTM SYSTEM**

In general, "seniorities" of identical earlier marks registered in any of the European Union member states can be included in the CTM registration to the effect that the application dates of the national rights are integrated in the community trademark - provided that there is some concurrence concerning the goods/services covered. Claiming such seniorities will on the long run have the advantage that a renewal of these national marks will no longer be necessary. If such seniorities are claimed and the national trademarks in question are not renewed, however, there might still be some danger in regard to the national marks if the community mark becomes subject to cancellation, since the national marks cannot be revived, but can proceed to registration as national trademark applications, which means that a new national application procedure would commence. A seniority should therefore only be claimed as an additional measure. After the community trademark being registered for several years, these trademark rights do not need to be renewed anymore. Please note that a seniority can only be claimed if

- the signs are identical,
- the lists of goods and services are at least partially identical and
- the marks have the same proprietor.

If you wish us to claim any seniorities, please advise.
