EDJX

THE COMMUNITY IS TH CLOUD.

NOVEMBER 2018

EDJX IS THE NEXT GEN PLATFORM

➤ Edjx harnesses converging revolutions in **Blockchain, Crypto Currency and Serverless** functions to deliver computing capacity at the **near-edge** - the last 100 feet between the device and the network.

➤ At the near-edge we allow **heterogeneous** compute sources to mesh into **dynamic computing clusters** that serve applications in real time.

The result is a better, faster Enterprise cloud computing experience for less money.
