

FV01 (6pc - 8ft)

Create space between exterior hard surfaces on 100s of mini-fingers forming gaps for moisture and air movement eliminating entrapped moisture: load bearing, bury/ tap backing, 5/16" added thickness, interlocking 16" lengths, removable or collapsible legs, trim to length with heavy scissors.
Separate decking from framing with no trapped moisture decay.
Separate siding/ cladding from sheathing with lateral open cavity.
Separate roofing layers with breathable airflow across rafters.
