STACK for pharmacy

A Pharmacy Information Ecosystem
for your most critical needs

Improved quality of care and ensured compliance through seamless, shared resources across all business areas of your organization.

STACK™ is a curated software solution to help pharmacies streamline the most complex areas of their organization into a searchable, manageable information ecosystem that works in tandem with the operations you've already established. Organize all of your content into customizable stacks, assign searchable characteristics, and easily schedule for ongoing review & attestation.

STACK is software as a service (SAAS) for document management retrieval and storage in the fields of healthcare, pharmacy and education.

STACK's Pharmacy Information Ecosystem integrates all critical areas of your pharmacy business to ensure security and compliance while lowering labor costs:

Accreditation Management

Curated content to help your pharmacy navigate the complexities of multiple accreditations.

Contractual Compliance

Prove you are compliant with contracts being signed to grow your business.

Gather info on employees through guided HR tracking.

STACK your content

"It often comes down to tangible evidence and a clear trail of

documentation." – URAC

SCHEDULE A DEMO

If you didn't document...it didn't happen!

You've heard it for years – but now there's a way to not only fix, but set

your organization up for success.
