

**BRILLIANCE  
AUTUMN FERN**

*Dryopteris erythrosora*  
'Brilliance'

**A SHADE LOVER™**  
18-24" H x 18-24" W Clump  
Zone: 5-8

**FEATURES**

This evergreen superior clone is a more colorful form of evergreen Autumn. The new fronds are lustrous and orange/bronze, becoming dark green at maturity. One of the Top 5 ferns sold, a great addition to your garden.

**LOCATION**

It prefers a moist, rich well-drained soil in light to heavy shade.

**SOIL**

It prefers moist soil rich in humus. Pulverize soil and amend with 3" of compost or peat moss.

**PLANTING**

Plant 18" apart as accent groupings of 3-5 plants or in staggered masses as a ground cover. Plant at the same depth as the top of soil in the container.

**CARE**

Top beds with 2" compost or peat moss, mulch each spring and keep moist. Evergreen leaves should be removed only when brown or hidden by new leaves. Use organic fertilizer at half rate. Do not cultivate soil.

**MATURITY**

The hardy perennial fern should mature in two years. It forms a slow, spreading clump that may be divided in spring or fall when mature.
