

## Investigations + fraud

We recognize that the identification, investigation and pursuit of fraudulent claims or fraudulent elements of claims are an integral part of claims administration, a critical part of our clients' risk strategy and an ongoing statutory obligation. Our fraud prevention program combines specific claim techniques and formalized special investigation units (SIU) designed to support fraud mitigation. These units in various regions around the world support employers and claim teams using the latest fraud detection techniques and technology, varied interventions for identified fraud and consultative advice on pursuing fraud in individual circumstances.

## Knowledge + skills development

Through [Vale Training](#), a Sedgwick company, we have over 60 years' experience offering training to U.S. professionals in insurance, auto repair, construction, green risk and claims at every stage of their career.
