interface

Platform ⌄   Solutions ⌄   Resources ⌄   About ⌄

Say hi to the most human-friendly IVAs.

Our platform helps build Intelligent Virtual Assistants. It acts as an interface, helping bridge the gap between man and machine. A unique

Industry Ready

The interface platform can support software needs across various industries.
Learn more about our industry-ready approach and domain coverage.

Solution Intensive

We create solutions at the speed of business.
Learn more about the solutions where IVAs can create a humungous business growth.

Salient feature

At interface, we believe every interface can be better. Here are some features that make ours a delight for enterprises looking to enable AI integration in their business growth.

Features

Context-aware, multi-turn conversations, with the help of integrated dynamic world models, packages, and contextual FAQ builders. We have brought together some features that provide an enterprise the edge over its competition.

Apps

There are applications aka apps

inside the platform to cater to various stages of IVA creation. Apps such as Academy to create and manage the knowledge base,

Advisory to measure assistant's performance, and more.

Learn more ·→

Languages & Channels

We equip businesses with the capability to speak many languages, thus giving a global edge to the business. In addition, our IVAs set the stage for multiple channels to get incorporated with the AI assistants.
