EARTH SCIENCE™

ECO-FRIENDLY GROWTH ESSENTIALS

GOOD STUFF IN – GOOD STUFF OUT.™

The thinking behind everything we do is simple – let nature do its thing. Our role is to support nature, not force it to become something it's not.

We believe the most important part of growing strong, beautiful plants is good soil. That's the foundation for every product we create. Our products are rich in natural ingredients to improve soil biology and made to work in harmony with nature. When your soil is working for you, the rest is easy.

We balance technology with biology in ways that are not only friendly to the things that grow in the ground, but those on top of it too. We embrace natural beauty from the ground up and respect that, when it comes to growing beautiful plants, you truly get out of it what you put into it.

FAST ACTING™ DOG SPOT REPAIR KIT

QUICKLY REPAIRS PET DAMAGED AREAS

Earth Science's Fast Acting Dog Spot Repair Kit has everything you need to quickly and easily fix pet damage in your lawn. Each bag contains premium grass seed, natural soil improvers, and a salt neutralizer. Just sprinkle, water and watch it grow! Here's how to get started:

QUICK START GUIDE

STEP 1

RAKE AREA

*** Rake area to remove dead grass and debris. Seeds grow best when they have direct contact with soil.

STEP 2

APPLY EVENLY

*** Evenly apply Earth Science Fast Acting Dog Spot Repair Kit so the area is mostly covered, but bare ground is still visible. Everything you need is pre-mixed and ready to use.

STEP 3

WATER

*** Water daily or as needed to keep the soil surface and grass seed moist for the first 2 weeks. This is critical for your grass seed to germinate and thrive.

100% GUARANTEED

Earth Science guarantees the performance of this product when used as instructed. If for any reason you are not satisfied with this product, mail us your original proof of purchase to obtain a full refund of your purchase price.

Water until the crystals expand and sparkle. When the crystals disappear, it's time to water again!

OTHER TIPS

- *** Keep people, pets, and lawnmowers off newly planted seed until the grass is 3 inches high.
- *** Apply when temperatures are consistently above 60° F.
