Compressor Controls Corporation

Compressor Controls Corporation (CCC) has specialized in turbomachinery controls for over 30 years. We serve customers in a broad range of industries including oil, gas, chemical, petrochemical, refineries, LNG, pipelines, steel mills, pharmaceutical, machine-building, and power generation facilities. We also construct new turbomachinery controls and retrofit existing equipment.

CCC has solved thousands of complex control problems for every type of application, operating over 7,500 trains around the world, including about 500 steam turbines. CCC is the largest gas turbine retrofitter worldwide with over 1,500 retrofits.

Over the years, Compressor Controls has earned the respect and loyalty of thousands of customers - our customer satisfaction rating is 98% worldwide. We target the root causes of specific problems to maximize production, throughput, and efficiency.

The CCC approach to designing fully integrated controls for the entire turbomachinery train (drivers and driven equipment) guarantees better performance of your turbomachinery, and dramatically improves your bottom line.

Want to know more about CCC Advantages? - Please follow the [link](#).

Compressor Controls Corporation is a wholly owned subsidiary of Roper Industries, Inc., a diversified provider of engineered products and solutions for global niche markets.

CCC has been ISO 9001 certified since 1994
