ELECTRIC UTILITY RAILWAYS PIPELINES TELECOM FIRE MAPPING

Corporate Information

**GeoDigital International is a world leader in field data acquisition, asset mapping, and expert visual and infrared inspection services for the electric utility, pipeline, telecommunications, highway, railway, and fire mapping industries.**

MANAGEMENT TEAM

BOARD OF DIRECTORS

Our integrated approach to incorporating advanced LiDAR systems, state-of-the-art digital imagers, and global positioning systems (GPS) with geographical information systems (GIS), have provided the quality services our clients expect and the results they need in delivering geographically referenced information and detailed data in customized formats quickly and reliably.

GeoDigital's highly trained experienced professionals have mapped more than 90,000 line miles (144,000 line kms) and over 850,000 structures worldwide using time-tested expertise and technology, proven to reduce client costs while providing critical data for inventory maintenance, security and regulatory compliance issues.

GeoDigital International provides services throughout North America from its Lompoc, CA. operations and data center. Additional data processing centers and sales offices are located in Toronto and Ottawa, Ontario, Canada.

Established through the acquisition by Management of the assets, personnel, and intellectual property of GeoDigital Technologies Inc., GeoDigital International is a new, privately held company with a heritage of over fifteen years of experience serving the demanding needs of a growing industry.

GeoDigital International is committed to building long-term relationships with our clients by providing quality service custom-tailored to their needs backed by personalized customer support.
