

ELECTRONICALLY SPEAKING, GATEWAY'S GOT IT!

Soldering Starter Set

An inexpensive way to stock a beginner's project bench. This bundle includes a tube of rosin core solder, 5' roll of wick for solder removal, a basic soldering iron, nippers, side cutters, and needle nose pliers, a flat/phillips changeable screwdriver, and a solder stand.

\$24.50

Note: some items may differ from pictures

Breadboard Bundle

A great value for prototyping, this bundle includes a 3260 tie point solderless breadboard with binding post connectors, an assortment of 90 pre-formed jumper wires in a convenient plastic case, a 9v DC wall transformer, 6 different LEDs (Red, yellow, and green 3mm and red yellow & green 5mm.)

\$49.95

Note: some items may differ from pictures.

9V Charger & Batteries

9-volt battery charger and two 9-volt rechargeable NiMH batteries

#4305-00014 \$7.95

FunFlyStick Levitation Wand

This is the coolest! A handheld Van de Graaf generator!!! Float mylar shapes around the room. Wow! 2 AA Batteries not included but you do get: 1 Magic Levitation Wand 1 Magic Wand Manual 5 Flying Mylar Shapes: "Sphere" x 3 "Butterfly" x 1 "Hourglass" x 1

#6150-00134 \$26.95

Hook-Up Wire

50' spools available in a solid or stranded in a variety of colors and gauges.

PNP BLUE

PnP Blue produces high quality prototype PCB resist layouts making your design ready to etch. PnP Blue is a Mylar (Polyester) backed material in which several layers of release agents and resist coatings are applied. An image is printed or photocopied onto this film, using a laser printer or photocopier (dry toner based), and subsequently ironed or pressed onto a cleaned copper clad board. The image area applied to the film is subsequently transferred to the copper board, along with the high quality resist (blue). The film is removed and resulting board is ready to etch in ferric chloride. 8-1/2"x11" sheets, 5/package.

#3550-00120 \$12.95

POWERED FORKLIFT KIT

Utilizing a 3-channel, self-centering remote system, the Remote Controlled Forklift moves forward/reverse, left/right and the fork moves up/down. The fork is moved by the use of a threaded rod, giving the forklift the ability to lift up to 100g. Assembly is simple, with a preformed plastic body and easy-to-assemble gearbox.

Basic Specifications Motor: FA-130 Remote: 3-channel Rear Wheel: Caster

#7000-00408 \$47.00
