Environmental Responsibility

When you choose G&K Services, you are making an environmentally responsible and ethical choice:

- G&K pioneered environmentally-safe cleaning processes. We clean your soiled products safely.
- Using G&K's industrial laundry process is much better for the environment than washing items in smaller loads at home.
- When you use G&K Services, our processes allow for maximized efficiency; using less water, energy and chemicals.
- G&K manages every aspect of the industrial laundry process in an effort to be environmentally efficient, responsible, and ethical.
- G&K implemented a Water Reuse System in several plants that further reduces our environmental impact. This system uses 50% less water and 30% fewer chemicals.

Industrial

The Industrial sector consists of manufacturing and industrial operations. The manufacturing sector consists of establishments engaged in the transformation of materials, substances, or components into new products. Industrial operations tend to incorporate heavy equipments with specialized skills in a specific setting.

G&K Services can help keep industrial employees focused on their work objectives through our apparel and facility services products. Our apparel and facility solutions keep employees safe, clean, branded and comfortable. G&K's products are made durable and long lasting so they can match the demanding requirements of an industrial environment.

Show pride in your facility by maintaining high standards for cleanliness, appearance and safety. G&K Services can help.
