Our Complete Approach

We can do more than simply administer IV therapies. Your team of professionals is skilled and experienced in IV therapy and is committed to your comfort and recovery. We have the knowledge to provide the following added services.

Clinical Pharmaceutical Services

Our registered pharmacists will review your medication profile to prevent overlapping therapies and/or drug interactions. We also monitor and verify your clinical status and lab results and make reports to your attending physician.

Skilled Nursing

Every one of HomeChoice's registered nurses has been specially trained in IV therapy procedures. Our nurses follow the standards of practice published by the Intravenous Nurses Society. The HomeChoice staff includes nurses that are board-certified through the Infusion Nurses Certification Corporation (INCC). These highly trained nurses are experts in treatment, nursing diagnosis, communication, implementation and evaluation. Our nurses are an excellent resource to all of the local nursing agencies and are available 24/7.

Your infusion nurse will provide you with the direct IV therapy support and education. This nurse will also work with other members of your health care team (e.g., physicians, pharmacists, and nutritional experts) to ensure safe, effective, quality care and prevent the duplication of services among your health care team.

Nutritional Support

If you are receiving enteral or parenteral nutritional therapies, our dietitians will provide comprehensive nutritional assessment and monitoring. The HomeChoice staff includes several board-certified nutritional support dietitians with broad expertise in caring for patients in need of nutritional support.

Supplies and Equipment

HomeChoice will arrange delivery of the necessary supplies and equipment associated with your therapy, such as infusion pumps and devices, directly to your home. Simply contact your HomeChoice home care representative. Should you need equipment support, clinical and technical support is available 24 hours a day, 7 days a week.

Insurance Billing

We will verify your insurance and bill your insurance provider directly for your therapy. In most instances, the HomeChoice pharmacy is an in-network or preferred provider. HomeChoice's reimbursement specialists work hard to maximize your insurance coverage while minimizing your out-of-pocket expenses.

At the initiation of your IV therapy, HomeChoice provides you with an explanation of the costs involved. If the insurance carrier requires a co-pay, cost share or deductible, we'll explain your expected financial responsibility. Check our list of [Insurance Partners](#) to verify that HomeChoice pharmacy is an approved provider.
