Hosting Services

Print A A A

Leave the technical management of your JDA Solutions to us through our Total Solutions Provider (TSP) Hosting Services program. Reserve your valuable resources for your top priority – running your core business – while we handle your applications and infrastructure. After all, no one knows JDA Solutions better than JDA!

We can help you get the most out of your JDA applications, enabling you to quickly realize valuable benefits and savings. We offer several hosting and managed services to ensure a fit tailored specifically to your organization. Whether your needs are as simple as hardware hosting or as substantial as complete JDA application management, we can do it all. Your new initiative just got a lot easier to launch!

Why JDA Hosting Services?

Take advantage of our best practice expertise to get a complete solution that delivers speed to market, convenience and cost-efficiency. Spread your capital investment over time instead of incurring the up-front hardware and infrastructure costs typical of systems purchases. With TSP, you receive one streamlined monthly bill combining your hardware, network infrastructure, hosting, application support and optional technical services.

With JDA as your single point of accountability, you can rest assured that responsive support is only a call away. We have a vested interest in your success and will do whatever it takes to maximize your experience. When you succeed, we succeed!
